Welcome to VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports

The updated *VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports*, is the second volume of a two-volume set of books for Visa members currently using VSS and for new Visa members. This guide does not include references to either the BASE II Settlement Service, or the SMS Settlement Service.

The Visa *Confidential* label displayed on each page indicates that the information in this document is intended for use by Visa employees, member banks, and external business partners that have signed a Nondisclosure Agreement (NDA) with Visa. This information is not for public release.

Please send questions or comments to Docline@visa.com.

About This Manual

The purpose of the *VisaNet Settlement Service (VSS) User's Guide* is to provide existing Visa members and processors the information they need to migrate to VSS.

AUDIENCE

VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports is intended for a variety of audiences. It should be read by business managers and technical and operations staff at member and processor sites. The information provided is applicable to both existing Single Message System (SMS)- and BASE II-connected members worldwide.

ORGANIZATION

The *VisaNet Settlement Service (VSS) User's Guide* is divided into two volumes.

Volume 1, Specifications

The *VisaNet Settlement Service (VSS) User's Guide, Volume 1, Specifications* contains 10 major sections.

Table 1 VisaNet Settlement Service (VSS) User's Guide, Volume 1, Specifications (Content Description)

Chapter and Title	Description
Chapter 1: VSS Overview	This chapter provides members with an overview describing VSS, including its features and functions.
Chapter 2: VSS Settlement Concepts	This chapter defines for members the settlement reporting entities and VSS settlement hierarchies.
Chapter 3: Settlement Processing Schedule	This chapter provides SMS- and BASE II-connected members with information on the daily settlement schedule and optional services that allow for earlier settlement reporting.
Chapter 4: Funds Transfer	This chapter describes for members the funds transfer process, including information on establishing a new funds transfer or changing an existing one.
Chapter 5: VSS Reporting and Messages	This chapter provides information about VSS reports, including reporting terminology, features, fees and charges reporting, report formats and delivery, and a list of mandatory and recommended VSS reports.
Chapter 6: SMS Reports and Raw Data	This chapter describes the SMS reports and raw data available to SMS-connected members.

Table 1 VisaNet Settlement Service (VSS) User's Guide, Volume 1, Specifications (Content Description) (continued)

Chapter and Title	Description
Chapter 7: Reconciliation	This chapter provides the information that both SMS- and BASE II-connected members and processors need to develop reconciliation procedures.
Chapter 8: Member Testing	This chapter describes the VSS testing and test planning available for SMS- and BASE II-connected members using the VisaNet Certification Management System (VCMS).
Chapter 9: Implementation	This chapter describes for members and processors the internal considerations necessary to implement VSS and provides information to assist them in defining their VSS requirements.
Glossary	This section contains definitions of VSS-related terms.

Volume 2, Reports

The *VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports* contains five appendixes. These appendixes supplement the information provided in *VisaNet Settlement Service (VSS) User's Guide, Volume 1, Specifications*.

NOTE

For latest updates and detailed information on V.I.P. message formats and field and code descriptions, refer to the V.I.P. technical documentation suite.

Table 2 VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports (Content Description)

Appendix and Title	Description
Appendix A, VSS Reports—Print-Ready Formats	This appendix contains a sample of each VSS report and detailed field descriptions.
Appendix B, VSS Reports—Machine-Readable Formats	This appendix contains machine-readable report formats for VSS reports.
Appendix C, VSS Codes	This appendix contains codes that are used in the machine-readable report formats.
Appendix D, SMS Reports and Raw Data	This appendix contains report layouts for SMS detail reports and record layouts for V.I.P. Raw Data Release 2.2 (VSS version).
Appendix E, VSS Business Transaction Types Cross-Reference	This appendix contains a cross-reference of SMS—including Interlink (ILM)—and BASE II transactions to VSS business transaction types.

About This Manual

The *VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports* addresses both SMS-connected and BASE II-connected members and processors worldwide as shown in the following table.

Table 3 Audience for VisaNet Settlement Service (VSS) User's Guide, Volume 2, Reports

Appendix and Title	SMS	BASE II
Appendix A, VSS Reports—Print-Ready Formats	✓	✓
Appendix B, VSS Reports—Machine-Readable Formats	✓	✓
Appendix C, VSS Codes	✓	✓
Appendix D, SMS Reports and Raw Data	✓	✓
Appendix E, VSS Business Transaction Types Cross-Reference	✓	✓

THIS PAGE INTENTIONALLY LEFT BLANK.

This appendix provides the following information for each report:

- **Report ID**—Identification of report
- **Report Title**—Title of report
- **Report Description and Highlights**—Purpose of the report and a brief description of report contents
- **Page Break**—Page break controls
- **Totals Provided**—Categories for which totals are provided on the report
- **Reconciliation Process**—When applicable, the process for reconciling this report to other VSS reports
- **Frequency**—How often the report is produced

Each report discussion includes a sample with field descriptions.

The following reports are produced by VSS:

- VSS-100-W—Weekly Settlement Reporting Hierarchy List
- VSS-100-R—Revised Settlement Reporting Hierarchy List
- VSS-110—Settlement Summary Report
- VSS-110-M—Monthly Settlement Summary Report
- VSS-111—Consolidated Settlement Summary Report
- VSS-115—SRE Settlement Recap Report
- VSS-115-M—Monthly SRE Settlement Recap Report
- VSS-120—Interchange Value Report
- VSS-120-M—Monthly Interchange Value Report
- VSS-130—Reimbursement Fees Report
- VSS-130-M—Monthly Reimbursement Fees Report
- VSS-131—Volume Discount Detail Report (U.S. only)
- VSS-131-M—Monthly Volume Discount Detail Report (U.S. only)
- VSS-135—Month-to-Date Reimbursement Fees Report
- VSS-136—Month-to-Date Volume Discount Detail Report (U.S. only)
- VSS-140—Visa Charges Report
- VSS-140-M—Monthly Visa Charges Report
- VSS-210—Currency Conversion Fees Report
- VSS-210-M—Monthly Currency Conversion Fees Report
- VSS-215—International Service Assessment Report
- VSS-215-M—Monthly International Service Assessment Report
- VSS-230—Visa Charges Reconciliation Report
- VSS-300—SRE Financial Recap Report
- VSS-600—Pending Settlement Report (Brazil and Japan only)
- VSS-610—Pending Fee Settlement Report
- VSS-640—Pending Charges Settlement Report

- VSS-900—Reconciliation Report
- VSS-900-M—Monthly Reconciliation Report
- VSS-900-P—Processor Reconciliation Report
- VSS-900-PM—Monthly Processor Reconciliation Report
- VSS-900-PS—Processor Summary Reconciliation Report
- VSS-900-S—Summary Reconciliation Report
- VSS-900-SM—Monthly Summary Reconciliation Report
- VSS-900-XM—Monthly Processor Reconciliation Report

A.1 WHAT IS NEW IN VSS REPORTS—PRINT-READY FORMATS

Because the authoring tool, Epic, has expanded formatting capabilities, the two appendixes A and D have undergone significant formatting changes.

Report samples have replaced figures.

Field names (as they appear on the report samples) have replaced numbered flags.

Explanation of report elements now appears as categorized text rather than in a table.

Empty cells in tables have been populated by the term, “Not applicable” to avoid confusion.

The heading, “Data Element Descriptions” has been replaced by “Field Descriptions.”

The information formerly presented in each report’s “Report Description” has been divided into “Description” and “Field Descriptions.”

The acronym “n/a” has been replaced by “Not applicable.”

A.2 ORDER OF DELIVERY

VSS reports are delivered in the following order:

- Destination BIN (field in report records)
- Daily/Monthly
- Processor/International Settlement/National Net Settlement
- Report ID
- SRE

Processors have an option as to what value is placed in the Destination BIN field in report records. When the BIN identification option is selected, the report Destination BIN is placed in the Destination BIN field of the machine-readable (TC 46) and print-ready (TC 47) report records. If this option is not used, the Report Destination processor is placed in the Destination BIN field. The processor is always in the

report records for summary-level SREs. The BIN identification option should be selected if the processor wants report records in BIN sequence. For more information on this option, refer to the BIN Identification section of the "Reporting and Messages" chapter in the *VisaNet Settlement Service (VSS) User's Guide, Volume 1, Specifications*.

Daily reports are delivered first. On the first processing day of each month, monthly reports for the previous month are delivered after the daily reports.

The VSS processor reports are delivered before the International Settlement Service and National Net Settlement Service reports.

Members participating in a National Net Settlement Service receive two sets of reports—one for the National Net Settlement Service and one for the International Settlement service.

If the National Net Settlement Service has a customized cutoff time, the reports for this service are delivered separately from the International Settlement Service reports. If the National Net Settlement Service has the same cutoff time as the International Settlement Service, then reports for the National Net Settlement Service follow those for the International Settlement Service in the same delivery.

The daily VSS processor reports are delivered in the following order:

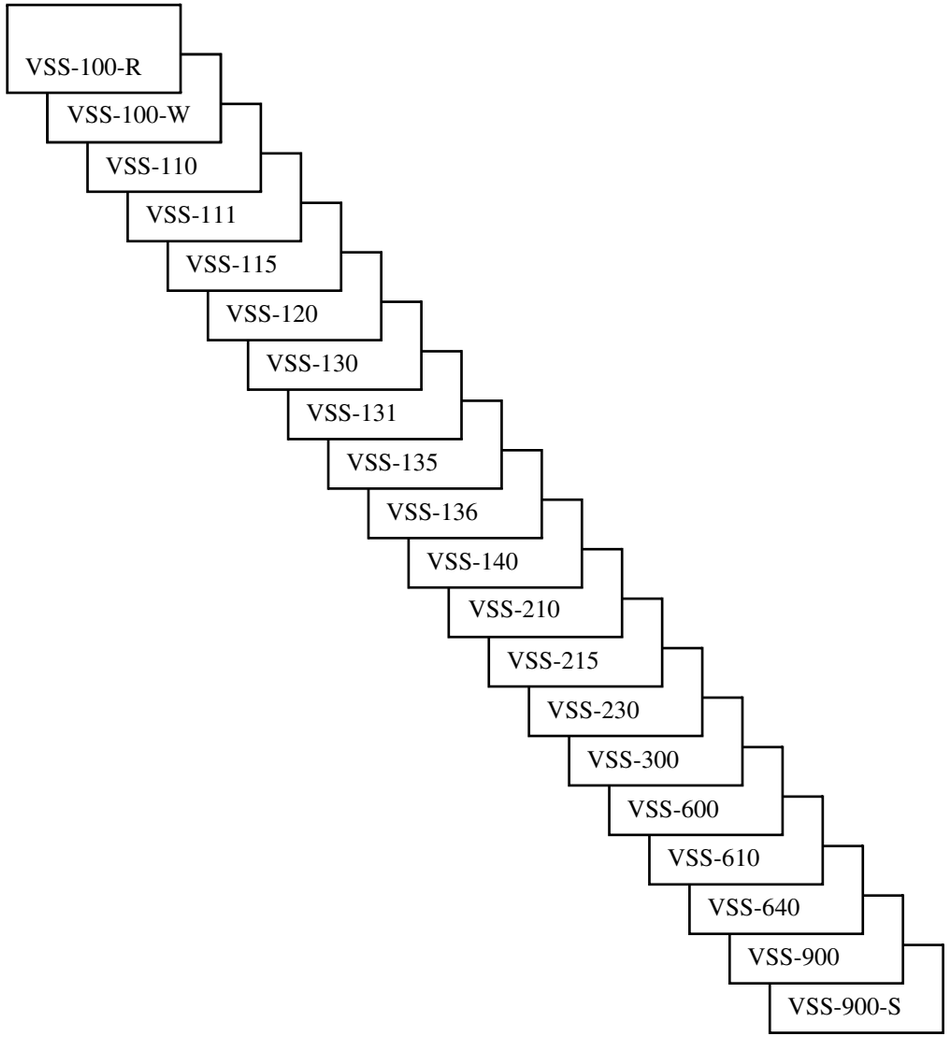
VSS-900–P

VSS-900–PS

The daily International Settlement and National Net Settlement reports are delivered in the order shown below.

NOTE

If a report is being sent for more than one SRE, the reports are sent in SRE sequence.



VSS-100-R
VSS-100-W
VSS-110
VSS-111
VSS-115

A.4 COMMON HEADER DATA ELEMENT DESCRIPTIONS

The following table contains the common header field description for VSS reports. For a description of the unique header fields that apply to a specific report, refer to the "Field Description" section of the report.

Table A-1 VSS Reports—Common Header Field Descriptions

Header Field Name	Contents
REPORT ID	VSS report IDs consist of three parts separated by dashes. The first part always contains the literal "VSS." The second part is the alphanumeric report identifier. The third part indicates the type of report, as follows: • Processor report (P) • Processor summary report (PS) • Member summary report (S) • Member monthly report (M) • Member weekly report (W) • Member revised report (R) The absence of the third part of the report ID indicates that the report is a member daily report.
REPORTING FOR	Settlement reporting entity (SRE) identifier and name for which the report was generated.
ROLLUP TO	Identifier and name of the summary SRE at the next highest level.
FUNDS XFER ENTITY	Funds transfer SRE identifier and name. This name identifies the SRE that is responsible for handling funds transfer on behalf of the Reporting for SRE.
SETTLEMENT CURRENCY	The 3-character, alphabetic settlement currency code.
CLEARING CURRENCY	The 3-character, alphabetic clearing currency code.
REPORT HEADING	VisaNet Settlement Service.
SETTLEMENT SERVICE NAME	Name of the settlement service; for example, the International Settlement Service or one of the National Net Settlement Services.
REPORT TITLE	Title of the VSS report.
FOR …	For monthly and month-to-date reports, first day of the month for which data has been accumulated. For periodic report, such as VSS-111, the date of the beginning of the period for which data is accumulated.

Table A-1 VSS Reports—Common Header Field Descriptions (continued)

Header Field Name	Contents
THROUGH ...	Last day of the reporting period. This is the last day of the month for monthly reports and the processing date for month-to-date reports. For periodic report, such as VSS-111, the date of the ending of the period for which data is accumulated.
PAGE	Page number.
PROC DATE	Date for which settlement was run.
REPORT DATE	Date the report was produced.
LAST CHANGE	Date on which the contents of the report were last modified

A.5 PRINT-READY FORMATS (VSS REPORTS)

This section describes VSS reports, print-ready formats.

A.6 VSS-100-W—WEEKLY SETTLEMENT REPORTING HIERARCHY LIST

A.6.1 VSS-100-W Frequency

Twice a week.

A.6.2 VSS-100-W Highlights

This report lists the portion of the settlement hierarchy for the Reporting for SRE and all SREs below it.

It shows the hierarchy of all the subordinate SREs whose totals are rolled up to the reports for the Reporting for SRE.

The report also shows the clearing entities that point to each lowest-level SRE.

A.6.3 VSS-100-W Reconciliation Process

Not applicable.

A.6.4 VSS-100-W Page Break

By page overflow.

A.6.5 VSS-100-W Totals

Not applicable.

A.6.6 VSS-100-W Description

This report provides a listing of the settlement hierarchy for the given SRE.

A.6.7 VSS-100-W Sample(s)

The following page provides a sample of the VSS-100–W report.

VSS-100-W Weekly Settlement Reporting Hierarchy List

A.6.9 VSS-100-W Field Descriptions

The following table provides the field descriptions for the VSS-100–W report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-2 VSS-100-W—Weekly Settlement Reporting Hierarchy List Field Description

Field Name	Description
Column	
SETTLEMENT REPORTING ENTITY (SRE) HIERARCHY	SREs that compose the settlement hierarchy for the Reporting for SRE.
SRE NAME	Name of the corresponding Settlement Reporting Entity (SRE).
FUNDS TRANSFER	Contains YES if the corresponding SRE is a funds transfer SRE. Otherwise, this field contains spaces.
CLEARING ENTITY ID	Contains all the clearing entity identifiers for the corresponding SRE, one per line. SREs at the lowest level in the settlement hierarchy may have one or more clearing entity IDs. SREs that are not at the lowest level in the settlement hierarchy will not have a clearing entity ID associated with them. If the clearing entity is a card range, then both the high and low ends of the range are printed.
PROCESSOR ID	Contains the processor ID for the corresponding clearing entity.
NETWORK ID	Contains the network ID for the corresponding clearing entity/processor combination. This field contains ALL when no specific network was identified when the SRE was established.
TXN CURR	Transaction Currency Contains the transaction currency code for the corresponding SRE. This field contains blanks when no specific transaction currency was identified when the SRE was established. The transaction currency option applies exclusively to the International Settlement Service and is currently available in the EU and CEMEA regions only.

A.7 VSS-100-R—REVISED SETTLEMENT REPORTING HIERARCHY LIST

A.7.1 VSS-100-R Frequency

When the settlement hierarchy changes or a member implements VSS.

A.7.2 VSS-100-R Highlights

This report lists the portion of the settlement hierarchy for the Reporting for SRE and all SREs below it. It is produced when one or more of the following fields in the VSS hierarchy changes or a member implements VSS:

- Settlement Reporting Hierarchy (SRE added or deleted)
- Settlement Reporting Entity Name
- Funds Transfer
- Clearing Entity ID
- Processor ID
- Network ID
- Transaction Currency

It shows the hierarchy of all the subordinate SREs whose totals are rolled up to the reports for the Reporting for SRE. The report also shows the clearing entities that point to each lowest-level SRE.

A.7.3 VSS-100-R Reconciliation Process

Not applicable.

A.7.4 VSS-100-R Page Break

By page overflow.

A.7.5 VSS-100-R Totals

Not applicable.

A.7.6 VSS-100-R Description

This report provides a listing of the settlement hierarchy for the given SRE.

A.7.7 VSS-100-R Sample(s)

The following is a report sample of VSS-100–R.

VSS-100-R Revised Settlement Reporting Hierarchy List

A.7.9 VSS-100-R Field Descriptions

The following table provides the field descriptions for the VSS-100–R report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-3 VSS-100-R Field Descriptions

Field Name	Description
Column	
SETTLEMENT REPORTING ENTITY (SRE) HIERARCHY	SREs that compose the settlement hierarchy for the Reporting for SRE.
SRE NAME	Name of the corresponding Settlement Reporting Entity Name (SRE).
FUNDS TRANSFER	Contains YES if the corresponding SRE is a funds transfer SRE. Otherwise, this field contains spaces.
CLEARING ENTITY ID	Contains all the clearing entity identifiers for the corresponding SRE, one per line. SREs at the lowest level in the settlement hierarchy may have one or more clearing entity IDs. SREs that are not at the lowest level in the settlement hierarchy will not have a clearing entity ID associated with them. If the clearing entity is a card range, then both the high and low ends of the range are printed.
PROCESSOR ID	Contains the processor ID for the corresponding clearing entity.
NETWORK ID	Contains the network ID for the corresponding clearing entity/processor combination. This field contains ALL when no specific network was identified when the SRE was established.
TXN CURR	Transaction Currency Contains the transaction currency code for the corresponding SRE. This field contains blanks when no specific transaction currency was identified when the SRE was established. The transaction currency option applies exclusively to the International Settlement Service and is currently available in the EU and CEMEA regions only.

A.8 VSS-110—SETTLEMENT SUMMARY REPORT

A.8.1 VSS-110 Frequency

Daily.

A.8.2 VSS-110 Highlights

Credit, debit, and net amounts are shown for interchange, reimbursement fees, and Visa charges for each business mode. The funds transfer amount is indicated at the top of the report if reporting is for a funds transfer SRE.

A.8.3 VSS-110 Reconciliation Process

The totals for interchange value reconcile to the totals by business mode shown on the VSS-120 report.

The totals for reimbursement fees reconcile to the totals by business mode shown on the VSS-130 report.

The totals for Visa charges reconcile to the totals by business mode shown on the VSS-140 report.

A.8.4 VSS-110 Page Break

None.

A.8.5 VSS-110 Totals

By:

- Interchange value, reimbursement fees, Visa charges
- Business mode

The net settlement amount for the reporting entity is also provided.

Funds Transfer Amount is shown if the report is for a funds transfer SRE.

A.8.6 VSS-110 Description

This report provides the summarized totals of the interchange value, reimbursement fees and Visa charges for the Reporting for SRE.

A.8.7 VSS-110 Sample(s)

The following page provides a sample of the VSS-110 report.

A.8.9 VSS-110 Field Descriptions

The following table provides the field descriptions for the VSS-110 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-4 VSS-110 Field Descriptions

Field Name	Description
Row	
FUNDS TRANSFER AMOUNT	Shown if the Reporting for SRE is a funds transfer SRE. The amount is the funds transfer amount for that entity.
TOTAL ACQUIRER	Total interchange value for acquirer transactions.
TOTAL ISSUER	Total interchange value for issuer transactions.
TOTAL OTHER	Total interchange value for other transactions.
TOTAL INTERCHANGE VALUE	Total interchange value for all transactions.
TOTAL ACQUIRER	Total reimbursement fees for acquirer transactions.
TOTAL ISSUER	Total reimbursement fees for issuer transactions.
TOTAL OTHER	Total reimbursement fees for other transactions.
TOTAL REIMBURSEMENT FEES	Total reimbursement fees for all transactions.
TOTAL ACQUIRER	Total Visa charges for acquirer transactions.
TOTAL ISSUER	Total Visa charges for issuer transactions.
TOTAL OTHER	Total Visa charges for other transactions.
TOTAL VISA CHARGES	Total Visa charges for all transactions.
TOTAL ACQUIRER	Total interchange value, fees, and charges for acquirer transactions.
TOTAL ISSUER	Total interchange value, fees, and charges for issuer transactions.
TOTAL OTHER	Total interchange value, fees, and charges for other transactions.
NET SETTLEMENT AMOUNT	Total interchange value, fees, and charges for all transactions.
Column	
COUNT	Total number of interchange transactions.
CREDIT AMOUNT	Total credits for corresponding row.
DEBIT AMOUNT	Total debits for corresponding row.

Table A-4 VSS-110 Field Descriptions (continued)

Field Name	Description
TOTAL AMOUNT	Net of credits (CREDIT AMOUNT) minus debits (DEBIT AMOUNT).

A.9 VSS-110-M—MONTHLY SETTLEMENT SUMMARY REPORT

A.9.1 VSS-110-M Frequency

Monthly.

A.9.2 VSS-110-M Highlights

The fields on this report are the same as those shown on the VSS-110 report.

The from and to dates in the report heading indicate the first and the last days of the month for which the data was accumulated.

A.9.3 VSS-110-M Reconciliation Process

The totals for interchange value reconcile to the totals by business mode shown on the VSS-120-M report.

The totals for reimbursement fees reconcile to the totals by business mode shown on the VSS-130-M report.

The totals for Visa charges reconcile to the totals by business mode shown on the VSS-140-M report.

A.9.4 VSS-110-M Page Break

None.

A.9.5 VSS-110-M Totals

By:

- Interchange value, reimbursement fees, Visa charges
- Business mode

The net settlement amount for the reporting entity is also provided.

Funds Transfer Amount is shown if the report is for a funds transfer SRE.

A.9.6 VSS-110-M Description

This report is the monthly version of the VSS-110 report.

A.9.7 VSS-110-M Sample(s)

The following page provides a sample of the VSS-110–M report.

A.11.9 VSS-115 Field Descriptions

The following table provides the field descriptions for the VSS-115 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-6 VSS-115 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS	Acquirer transactions section heading.
BUSINESS TRANSACTION TYPE	All original transactions submitted by the acquirer that are not reversals for the business transaction type listed.
REPRESENTMENTS	All representment transactions that are not reversals submitted by the acquirer.
TOTAL INTERCHANGE	Total interchange value for all acquirer activity.
REIMBURSEMENT FEES	Reimbursement fees assessed on all acquirer transactions.
VISA CHARGES	Visa charges for all acquirer transactions.
TOTAL ACQUIRER	Totals for all acquirer activity for this SRE.
ISSUER TRANSACTIONS	Issuer transactions section heading.
BUSINESS TRANSACTION TYPE	All original transactions received by the issuer that are not reversals for the business transaction type listed.
REPRESENTMENTS	All representment transactions that are not reversals received by the issuer.
TOTAL INTERCHANGE	Total interchange value for all issuer activity.
REIMBURSEMENT FEES	Reimbursement fees assessed on issuer transactions.
VISA CHARGES	Visa charges for all issuer transactions.
TOTAL ISSUER	Totals for all issuer activity for this SRE.
OTHER TRANSACTIONS	Other transactions section heading.
TOTAL INTERCHANGE	Total interchange value for all other activity.
REIMBURSEMENT FEES	Reimbursement fees assessed on other transactions.
VISA CHARGES	Visa charges for all other transactions.
TOTAL OTHER	Totals for all other activity for this SRE.
TOTAL	Total values for all activity for this SRE.
FINAL SETTLEMENT NET AMOUNT	Net settlement amount for all activity for this SRE.
Column	
CREDITS COUNT	Number of transactions with a credit (CR) value for category listed in left-hand column of report.

Table A-6 VSS-115 Field Descriptions (continued)

Field Name	Description
CREDITS AMOUNT	Total credit value for transactions in category listed in left-hand column of report.
DEBITS COUNT	Number of transactions with a debit (DB) value for category listed in left-hand column of report.
DEBITS AMOUNT	Total debit value for transactions in category listed in left-hand column of report.
TOTAL COUNT	Number of all transactions for category listed in left-hand column of report.
TOTAL AMOUNT	Net amount (credits less debits) for category listed in left-hand column of report.

A.12 VSS-115-M—MONTHLY SRE SETTLEMENT RECAP REPORT

A.12.1 VSS-115-M Frequency

Monthly.

A.12.2 VSS-115-M Highlights

The fields on this report are the same as those shown on the VSS-115 report.

The from and to dates in the report heading indicate the first and the last days of the month for which the data was accumulated.

A.12.3 VSS-115-M Reconciliation Process

The totals for interchange value reconcile to the totals by business mode shown on the VSS-120-M report.

The totals for reimbursement fees reconcile to the totals by business mode shown on the VSS-130-M report.

The totals for Visa charges reconcile to the totals by business mode shown on the VSS-140-M report.

This report can also be reconciled back to the VSS-110-M report.

A.12.4 VSS-115-M Page Break

Not applicable.

A.12.5 VSS-115-M Totals

By:

- Interchange value, reimbursement fees, and Visa charges
- Business mode

The net settlement amount for the reporting entity is also provided.

A.12.6 VSS-115-M Description

This report is the monthly version of the VSS-115 report.

A.12.7 VSS-115-M Sample(s)

The following page provides a sample of the VSS-115–M report.

A.12.9 VSS-115-M Field Descriptions

For field descriptions of the VSS-115-M report, refer to the field descriptions section of the VSS-115 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.13 VSS-120—INTERCHANGE VALUE REPORT

A.13.1 VSS-120 Frequency

Daily.

A.13.2 VSS-120 Highlights

This report lists the transactions by clearing currency and provides net totals by clearing currency.

Summary totals in settlement currency are provided across all clearing currencies.

The report lists the currency rate table date of the applicable conversion rates for all reversals.

A.13.3 VSS-120 Reconciliation Process

The interchange value totals for each business mode balance to the interchange values on the Settlement Summary report, VSS-110, and the SRE Settlement Recap report, VSS-115.

A.13.4 VSS-120 Page Break

- Clearing currency
- Business mode

A.13.5 VSS-120 Totals

Totals and net amounts are provided at the following levels:

- Business transaction
- Business mode

In addition, subtotals are provided by business transaction cycle level if there are two or more print lines for the cycle.

A.13.6 VSS-120 Description

This report provides interchange values in settlement currency.

A.13.7 VSS-120 Sample(s)

The following pages provide samples of the VSS-120 report.

A.13.10 VSS-120 Field Descriptions

The following table provides the field descriptions for the VSS-120 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-7 VSS-120 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS or ISSUER TRANSACTIONS	Business mode description. Business mode can be acquirer, issuer, or other.
PURCHASE	Business transaction type.
ORGINAL SALE	Business transaction Cycle.
TOTAL PURCHASE	Business transaction totals. Total counts and amounts for the business transaction type.
NET PURCHASE	Business transaction net values. Net value (credits minus debits) for the business transaction type.
TOTAL ACQUIRER INTERCHANGE or TOTAL ISSUER INTERCHANGE or TOTAL OTHER INTERCHANGE	Business mode totals. Total counts and amounts for the business mode.
NET ACQUIRER INTERCHANGE or NET ISSUER INTERCHANGE or NET OTHER INTERCHANGE	Business mode net values Net value (credits minus debits) for the business mode. Business mode can be acquirer, issuer, or other.

Table A-7 VSS-120 Field Descriptions (continued)

Field Name	Description
Column	
CURRENCY TABLE DATE	The effective date of currency rate used for the transactions. This field appears only on the lowest-level summary lines if the settlement currency is different than the clearing currency or if the transaction is a reversal and currency conversion was performed.
COUNT	Number of cleared transactions included in this settlement
CLEARING AMOUNT	The clearing amount for the issuer transactions is the cardholder's billing amount. The cardholder billing amount includes the transaction amount, currency conversion fees (if applicable), and the optional issuer fees (if applicable). The clearing amount for other transactions is the transaction amount.
INTERCHANGE VALUE CREDITS	Interchange Value (credits).
INTERCHANGE VALUE DEBITS	Interchange Value (debits).

A.14 VSS-120-M—MONTHLY INTERCHANGE VALUE REPORT

A.14.1 VSS-120-M Frequency

Monthly.

A.14.2 VSS-120-M Highlights

The from and to dates that appear in the report heading indicate the first and last days of the month for which data was accumulated. The fields on this report are the same as those shown on the VSS-120 report.

A.14.3 VSS-120-M Reconciliation Process

The monthly interchange value totals for each business mode balance to the interchange values on the Monthly Settlement Summary report, VSS-110-M, and the SRE Settlement Recap report, VSS-115-M.

A.14.4 VSS-120-M Page Break

- Clearing currency
- Business mode

A.14.5 VSS-120-M Totals

Totals and net amounts are provided at the following levels:

- Business transaction
- Business mode

In addition, subtotals are provided by business transaction cycle level if there are two or more print lines for the cycle.

A.14.6 VSS-120-M Description

This report is the monthly version of the VSS-120 report.

A.14.12 VSS-120-M Field Descriptions

For field descriptions of the VSS-120-M report, refer to the field descriptions section of the VSS-120 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.15 VSS-130—REIMBURSEMENT FEES REPORT

A.15.1 VSS-130 Frequency

Daily.

A.15.2 VSS-130 Highlights

This report lists reimbursement fees by fee levels within routings and jurisdiction for each transaction type. The report sequence structure is as follows:

- Transaction
- Jurisdiction
- Routing
- Fee Level

This report provides a summary of all reimbursement fees by business mode.

Effective since 28 March 1998, the fee descriptions, such as Standard and Electronic Interchange Reimbursement Fee (EIRF), will be sorted alphabetically by name.

NOTE

Transactions for which the Interchange Reimbursement Fee total is zero do not appear on this report.

A.15.3 VSS-130 Reconciliation Process

The Reimbursement Fees totals balance to the reimbursement fees on the Settlement Summary report, VSS-110, and the SRE Settlement Recap report, VSS-115.

A.15.4 VSS-130 Page Break

By business mode.

A.15.5 VSS-130 Totals

By:

- Business mode
- Business transaction type
- Cycle
- Jurisdiction
- Routing
- Fee level

A.15.6 VSS-130 Description

This report provides reimbursement fees information in settlement currency.

A.15.7 VSS-130 Sample(s)

The following pages provide samples of the VSS-130 report.

A.15.20 VSS-130 Field Descriptions

The following table provides the field descriptions for the VSS-130 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-8 VSS-130 Field Descriptions

Field	Description
Row	
ACQUIRER TRANSACTION	Business mode description.
PURCHASE	Business transaction type.
ORIGINAL VALUE	Business transaction cycle.
VISA INTERNATIONAL	Jurisdiction Description Jurisdiction for transaction.
E.U. – U.S.A.	Routing Description If routing of transaction is interregion, then the "from region" and "to region" descriptions are shown. If the routing is intraregion or domestic, then the "from country" and "to country" descriptions are shown. Fee-level description.
INTL PRE-PS2000	Fee Level Description
TOTAL VISA INTERNATIONAL	Routing Subtotal Routing subtotals are produced when there are two or more fee levels for the routing. The Routing subtotal is suppressed if there is only a single fee level.
TOTAL VISA E.U.	Total Jurisdiction Jurisdiction subtotals are produced when there are two or more routings for the Jurisdiction. The Jurisdiction subtotal is suppressed if there is only a single routing.
TOTAL ORIGINAL SALE	Total Cycle Cycle totals are produced when there are two or more jurisdictions for a cycle. The cycle subtotal is suppressed if there is only a single jurisdiction.
TOTAL PURCHASE	Total Business Transaction Totals for business transaction type are always produced.

Table A-8 VSS-130 Field Descriptions (continued)

Field	Description
NET PURCHASE	Net Business Transaction The difference between the Reimbursement Fee Credits and Reimbursement Fee Debits. Net values can be either credits or debits.
TOTAL ACQUIRER REIMB FEES	Total Business Mode Totals for business mode are always produced.
NET ACQUIRER REIMB FEES	Net Business Mode The difference between the Reimbursement Fee Credits and Reimbursement Fee Debits for the corresponding business mode. Net values can be either credits or debits.
Column	
COUNT	Number of cleared transactions.
INTERCHANGE AMOUNT	Interchange amount of transactions for which fees are calculated.
REIMBURSEMENT FEE CREDITS	Reimbursement fee amount (credits).
REIMBURSEMENT FEE DEBITS	Reimbursement fee amount (debits).

A.16 VSS-130-M—MONTHLY REIMBURSEMENT FEES REPORT

A.16.1 VSS-130-M Frequency

Monthly.

A.16.2 VSS-130-M Highlights

Since 28 March 1998, the fee descriptions, such as Standard and Electronic Interchange Reimbursement Fee (EIRF), have been sorted alphabetically by name.

NOTE

Transactions for which the Interchange Reimbursement Fee total is zero do not appear on this report.

A.16.3 VSS-130-M Reconciliation Process

The Reimbursement Fees totals balance to the reimbursement fees on the Monthly Settlement Summary report, VSS-110-M, and the Monthly SRE Settlement Recap report, VSS-115-M.

A.16.4 VSS-130-M Page Break

By business mode.

A.16.5 VSS-130-M Totals

By:

- Business mode
- Business transaction type
- Cycle
- Jurisdiction
- Routing Fee level

A.16.6 VSS-130-M Description

This report provides monthly reimbursement fees information in settlement currency.

The fields on this report are the same as those shown on the VSS-130 report.

The from and to dates in the report heading indicate the first and the last days of the month for which the data was accumulated.

A.16.7 VSS-130-M Sample(s)

The following pages provide samples of the VSS-130-M report.

A.16.21 VSS-130-M Field Descriptions

For field descriptions of the VSS-130-M report, refer to the field descriptions section of the VSS-130 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.17 VSS-131—VOLUME DISCOUNT DETAIL REPORT (U.S. ONLY)

A.17.1 VSS-131 Frequency

Daily.

A.17.2 VSS-131 Highlights

This report lists volume discount information by merchant volume indicator within routings, fee levels, and jurisdiction for each transaction type. The report sequence structure is as follows:

- Transaction
- Jurisdiction
- Routing
- Fee Level
- Merchant Fee Indicator

The fee level descriptors are sorted alphabetically by name.

NOTE

The report shown on the next page is a sample of the VSS-131 report and does not reconcile to the other reports.

A.17.3 VSS-131 Reconciliation Process

Total reduction equals current reduction plus reserve reduction.

A.17.4 VSS-131 Page Break

By business mode.

A.17.5 VSS-131 Totals

By fee level.

A.17.6 VSS-131 Description

This report provides volume discount information for U.S. members.

A.17.7 VSS-131 Sample(s)

The following pages provide samples of the VSS-131 report.

A.17.16 VSS-131 Field Descriptions

The following table provides the field descriptions for the VSS-131 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-9 VSS-131 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS	Business Mode Business mode description.
PURCHASE	Business Transaction Type
ORIGINAL SALE	Business Transaction Cycle
VISA U.S.A.	Jurisdiction Description Jurisdiction for transaction.
U.S.A. – A.P.	Routing Description If routing of transaction is interregion, then the "from region" and "to region" descriptions are shown. If the routing is domestic, then the "from country" and "to country" descriptions are shown.
CPS/HTL–CAR CNP	Fee-level description
MVI 09	Merchant Volume Indicator.
TOTAL	Total by fee level
Column	
COUNT	Number of cleared transactions.
INTERCHANGE AMOUNT	Interchange amount of transactions for which fees are calculated.
TOTAL REDUCTION AMOUNTS	The amount to be reduced if the full Merchant Volume Indicator (MVI) percentage is applied. This field is only available under acquirer transactions.
CURRENT REDUCTION AMOUNTS	The total reduction on amount minus the reserve reduction amount. This field is available only under acquirer transactions.
RESERVE REDUCTION AMOUNT	An amount equal to 25% of the total reduction amount. This field is available only under acquirer transactions.
NET REIMBURSEMENT FEE	Settled interchange fee.

A.18 VSS-131-M—MONTHLY VOLUME DISCOUNT DETAIL REPORT (U.S. ONLY)

A.18.1 VSS-131-M Frequency

Monthly.

A.18.2 VSS-131-M Highlights

The fields on this report are the same as those shown on the VSS-131 report. The fee level descriptions are sorted alphabetically by name.

NOTE

The report shown on the next page is a sample of the VSS-131-M report and does not reconcile with the other reports.

A.18.3 VSS-131-M Reconciliation Process

Total reduction equals current reduction plus reserve reduction.

A.18.4 VSS-131-M Page Break

By business mode.

A.18.5 VSS-131-M Totals

By fee level.

A.18.6 VSS-131-M Description

This report provides monthly volume discount information for U.S. members.

The from and to dates in the report heading indicate the first and the last days of the month for which the data was accumulated.

A.18.7 VSS-131-M Sample(s)

The following pages provide samples of the VSS-131-M report.

A.18.24 VSS-131-M Field Descriptions

For field descriptions of the VSS-131-M report, refer to the field descriptions section of the VSS-131 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.19 VSS-135—MTD REIMBURSEMENT FEES REPORT

A.19.1 VSS-135 Frequency

Daily

A.19.2 VSS-135 Highlights

This report lists daily and month-to-date reimbursement fees by fee level by business mode and jurisdiction.

Three lines are printed for each fee level. The first line shows credits, the second line shows debits, and the third line shows the net amount. Interchange counts and amounts for the associated fees are also shown on this report.

Effective since 28 March 1998, the fee level descriptions, such as Standard and Electronic Interchange Reimbursement Fee (EIRF), will be sorted alphabetically by name.

NOTE

Transactions for which the Interchange Reimbursement Fee total is zero do not appear on this report.

A.19.3 VSS-135 Reconciliation Process

The Reimbursement Fees daily totals balance to the reimbursement fees on the Settlement Summary report, VSS-110, and the SRE Settlement Recap report, VSS-115.

A.19.4 VSS-135 Page Break

By business mode.

A.19.5 VSS-135 Totals

By:

- Fee level
- Jurisdiction
- Business mode

A.19.6 VSS-135 Description

This report provides daily and month-to-date (MTD) reimbursement fees at the fee level.

A.19.7 VSS-135 Sample(s)

The following pages provide samples of the VSS-135 report.

A.19.22 VSS-135 Field Descriptions

The following table provides the field descriptions for the VSS-135 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-10 VSS-135 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTION	Business Mode Business mode heading.
VISA INTERNATIONAL	Jurisdiction Jurisdiction description.
INTL PRE–PS2000	Fee Level Fee-level description.
DEBITS	Fee Level Debits Row Counts, interchange amounts, and fees for transactions when the daily interchange amount is a debit.
CREDITS	Fee Level Credits Row Counts, interchange amounts, and fees for transactions when the daily interchange amount is a credit or is equal to zeros.
NET	The net of the fee-level credits amounts and the fee-level debits amounts. Net values can be either credits or debits.
TOTAL VISA INTERNATIONAL	Total Jurisdiction The sum of all net amounts for the jurisdiction.
TOTAL ACQUIRER REIMBURSEMENT FEES	The sum of all net amounts for the business mode.
Column	
DAILY COUNT	Number of transactions for the corresponding fee level.
DAILY INTERCHANGE AMOUNTS	Total interchange amount for the corresponding fee level.
DAILY REIMBURSEMENT FEES	Total reimbursement fees for the corresponding fee level.
MTD COUNT	Month-to-date count of transactions for the corresponding fee level.
MTD INTERCHANGE AMOUNT	Month-to-date interchange amount for the corresponding fee level.

Table A-10 VSS-135 Field Descriptions (continued)

Field Name	Description
MTD REIMBURSEMENT FEES	Month-to-date reimbursement fees for the corresponding fee level.

A.20 VSS-136—MTD VOLUME DISCOUNT DETAIL REPORT (U.S. ONLY)

A.20.1 VSS-136 Frequency

Daily.

A.20.2 VSS-136 Highlights

This report lists month-to-date volume discount information and business reimbursement fees by fee level by merchant volume indicator within debit or credit, fee level, and business mode.

Interchange counts and amounts for the associated fees are also shown on this report.

The fee level descriptions are sorted alphabetically by name.

NOTE

The report shown on the next page is a sample of the VSS-136 report and does not reconcile to the other reports.

A.20.3 VSS-136 Reconciliation Process

MTD total reduction equals MTD current reduction plus MTD reserve reduction.

A.20.4 VSS-136 Page Break

By business mode.

A.20.5 VSS-136 Totals

By fee level.

A.20.6 VSS-136 Description

This report provides month-to-date (MTD) volume discount information for U.S. members.

A.20.7 VSS-136 Sample(s)

The following pages provide samples of the VSS-136 report.

A.20.21 VSS-136 Field Descriptions

The following table provides the field descriptions for the VSS-136 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-11 VSS-136 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS	Business Mode Business mode heading.
VISA U.S.A.	Jurisdiction Jurisdiction description.
BUSINESS ELCTC	Fee Level Fee-level description.
DEBITS	Fee Level Debits Row Count and amounts for transactions when the daily interchange amount is a debit.
CREDITS	Fee Level Credits Row Count and amounts for transactions when the daily interchange amount is a credit or is equal to zeros.
MVI 09	Merchant Volume Indicator
Column	
MTD COUNT	Month-to-date count of transactions for the corresponding fee level.
MTD INTERCHANGE AMOUNTS	Month-to-date interchange amount for the corresponding fee level.
MTD TOTAL REDUCTION	Month-to-date reduction amount of the full Merchant Volume Indicator percentage if applied. This field is available only under acquirer transactions.
MTD CURRENT REDUCTION	Month-to-date total reduction amount minus the reserve reduction amount. This field is available only under acquirer transactions.
MTD RESERVE REDUCTION	Month-to-date amount equal to 25 % of the total reduction amount. This field is available only under acquirer transactions.
MTD NET REIMBURSEMENT FEE	Month-to-date net reimbursement fees for the corresponding fee level.

A.21 VSS-140—VISA CHARGES REPORT

A.21.1 VSS-140 Frequency

Daily.

A.21.2 VSS-140 Highlights

All Visa charges are combined in one report. This report provides a summary of all charges by business mode.

A.21.3 VSS-140 Reconciliation Process

The Visa Charges totals reconcile to the charges on the Settlement Summary report, VSS-110, and the SRE Settlement Recap report, VSS-115.

A.21.4 VSS-140 Page Break

On business mode.

A.21.5 VSS-140 Totals

By:

- Business mode
- Charge type
- Business transaction type
- Cycle
- Jurisdiction
- Routing

A.21.6 VSS-140 Description

This report provides details of all charges paid to Visa by members and paid by Visa to members. These charge types include:

- BASE II Processing charges
- International Acquiring Fee
- Special Airline Fees
- Currency Conversion Fees
- Currency Conversion Fees allocations
- Returned item charges
- International Service Assessment
- International Service Assessment Allocation

NOTE

BASE II processing charges are not included when members are in regions where BASE II processing charges are billed monthly using the Integrated Billing Statement.

A.21.7 VSS-140 Sample(s)

The following pages provide samples of the VSS-140 report.

VISA CHARGES DEBITS	Visa charges (debits)

A.22 VSS-140-M—MONTHLY VISA CHARGES REPORT

A.22.1 VSS-140-M Frequency

Monthly.

A.22.2 VSS-140-M Highlights

All Visa charges are combined in one report. This report provides a summary of all charges by business mode.

A.22.3 VSS-140-M Reconciliation Process

The Visa Charges totals reconcile to the charges on the Monthly Settlement Summary report VSS-110 and the Monthly SRE Settlement Recap report VSS-115.

A.22.4 VSS-140-M Page Break

On business mode.

A.22.5 VSS-140-M Totals

By:

- Business mode
- Charge type
- Business transaction type
- Cycle
- Jurisdiction
- Routing

A.22.6 VSS-140-M Description

This report is the monthly version of the VSS-140 report.

The from and to dates that appear in the report heading indicate the first and the last days of the month for which data was accumulated.

The fields on this report are the same as those shown on the VSS-140 report.

A.22.7 VSS-140-M Sample(s)

The following pages provide samples of the VSS-140-M report.

A.22.18 VSS-140-M Field Descriptions

For field descriptions of the VSS-140-M report, refer to the field descriptions section of the VSS-140 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.23 VSS-210—CURRENCY CONVERSION FEES REPORT

A.23.1 VSS-210 Frequency

Daily.

A.23.2 VSS-210 Highlights

Transactions are summarized by clearing currency, business transaction, and jurisdiction.

This report provides conversion fees by clearing currency.

The interchange amounts are shown in both settlement currency and clearing currency.

The optional issuer fee is shown in clearing currency (if applicable).

A.23.3 VSS-210 Reconciliation Process

The interchange amounts and conversion fees in settlement currency by jurisdiction, business transaction type, and cycle reconcile to the conversion fees for the issuer on the Visa Charges report, VSS-140.

A.23.4 VSS-210 Page Break

By clearing currency.

A.23.5 VSS-210 Totals

This report provides currency conversion fees totals for incoming issuer transactions by:

- Business transaction type
- Cycle
- Jurisdiction

A.23.6 VSS-210 Description

This report provides reconciliation information to issuers for the currency conversion fees and optional issuer fees for incoming transactions.

A.23.7 VSS-210 Sample(s)

The following pages provide samples of the VSS-210 report.

A.23.11 VSS-210 Field Descriptions

The following table provides the field descriptions for the VSS-210 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-13 VSS-210 Field Descriptions

Field Name	Description
Row	
ISSUER TRANSACTIONS	Business Mode
PURCHASE	Business Transaction Type
ORIGINAL SALE	Cycle Business transaction cycle.
VISA INTERNATIONAL	Jurisdiction Jurisdiction description.
VISA E.U.	Total cycle. Only printed if there are two or more jurisdictions for the cycle. This line is not shown because there is only one jurisdiction for each cycle.
TOTAL ORIGINAL SALE	Totals for business transaction. These totals are always printed.
TOTAL PURCHASE	Totals for all incoming presentments for which there are currency conversion fees. These totals are always printed.
TOTAL CURRENCY CONVERSION FEES	Total for incoming transactions for which there are currency conversion fees. These totals are always printed.
Column	
SETTLEMENT CURRENCY INTERCHANGE AMOUNT	Interchange amount in settlement currency.
SETTLEMENT CURRENCY CURRENCY CONVERSION FEE	Currency Conversion Fee in settlement currency.
CLEARING CURRENCY INTERCHANGE AMOUNT	Interchange amount in clearing currency.

Table A-13 VSS-210 Field Descriptions (continued)

Field Name	Description
CLEARING CURRENCY CURRENCY CONVERSION FEE	Currency Conversion Fee in clearing currency.
OPT ISSUER FEE	Optional Issuer Fee in clearing currency.

A.24 VSS-210-M—MONTHLY CURRENCY CONVERSION FEES REPORT

A.24.1 VSS-210-M Frequency

Monthly.

A.24.2 VSS-210-M Highlights

The from and to dates that appear in the report heading indicate the first and the last days of the month for which data was accumulated.

The fields on this report are the same as those shown on the VSS-210 report.

A.24.3 VSS-210-M Reconciliation Process

The interchange amounts and conversion fees in settlement currency by jurisdiction, business transaction type, and cycle reconcile to the conversion fees for the Issuer on the Monthly Visa Charges report, VSS-140-M.

A.24.4 VSS-210-M Page Break

By clearing currency.

A.24.5 VSS-210-M Totals

This report provides currency conversion fees totals for incoming issuer transactions by:

- Business transaction type
- Cycle
- Jurisdiction

A.24.6 VSS-210-M Description

This report is the monthly version of the VSS-210.

A.24.7 VSS-210-M Sample(s)

A.24.11 VSS-210-M Field Descriptions

For field descriptions of the VSS-210-M report, refer to the field descriptions section of the VSS-210 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.25 VSS-215—INTERNATIONAL SERVICE ASSESSMENT REPORT

A.25.1 VSS-215 Frequency

Daily.

A.25.2 VSS-215 Highlights

Transactions are summarized by clearing currency, business transaction type, and jurisdiction. The report provides international service assessment charge by clearing currency. The interchange amounts are shown in both settlement currency and clearing currency. The optional ISA fee is shown in clearing currency, if applicable.

A.25.3 VSS-215 Reconciliation Process

The interchange amounts and international service assessment charges in settlement currency by jurisdiction, business transaction type, and cycle reconcile to the international service assessment charges for the issuer on the Visa Charges report, VSS-140.

A.25.4 VSS-215 Page Break

By clearing currency.

A.25.5 VSS-215 Totals

This report provides international service assessment charges totals for incoming issuer transactions by:

- Business transaction type
- Cycle
- Jurisdiction

A.25.6 VSS-215 Description

This report provides reconciliation information to issuers for the international service assessment charges and optional ISA fees for incoming transactions.

A.25.7 VSS-215 Sample(s)

The following page provides a sample of the VSS-215 report.

A.27.9 VSS-230 Field Descriptions

For VSS-230 field descriptions, refer to the field descriptions for the VSS-140 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.28 VSS-300—SRE FINANCIAL RECAP REPORT

A.28.1 VSS-300 Frequency

Daily

A.28.2 VSS-300 Highlights

Separate detail lines are provided for interchange value, reimbursement fees, and Visa charges.

A.28.3 VSS-300 Reconciliation Process

Interchange value, reimbursement fees, and Visa charges reconcile to the VSS-110 report for the Recap For SRE.

A.28.4 VSS-300 Page Break

Not applicable. A report group for a given SRE will not split across pages.

A.28.5 VSS-300 Totals

Net settled for each SRE.

A.28.6 VSS-300 Description

The VSS-300 report provides the summarized totals of the interchange value, reimbursement fees, and Visa charges for each SRE that is directly subordinate to the Reporting for SRE.

Note that the recap is only provided for those SREs that are directly below the Reporting for SRE.

Information about the existence of any SREs further down in the hierarchy may be obtained with the VSS-100-W or VSS-100-R report.

A.28.7 VSS-300 Sample(s)

The following page provides a sample of the VSS-300 report.

A.28.9 VSS-300 Field Descriptions

The following table provides the field descriptions for the VSS-300 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-15 VSS-300 Field Descriptions

Field Name	Description
Row	
RECAP FOR	Settlement Reporting Entity (SRE) identifier and name.
ACQUIRER	Counts and amounts for acquirer transactions.
ISSUER	Counts and amounts for issuer transactions.
OTHER	Counts and amounts for other transactions.
NET SETTLEMENT AMOUNT	Counts and amounts for all transactions.
Column	
TOTAL INTERCHANGE COUNT	Total number of interchange transactions for the corresponding row.
TOTAL INTERCHANGE VALUE	Total interchange value for the corresponding row.
TOTAL REIMBURSEMENT FEES	Total reimbursement fees for the corresponding row.
TOTAL VISA CHARGES	Total Visa charges for the corresponding row.
NET SETTLEMENT AMOUNT	Net settlement amount. Total of interchange, fees, and charges for the corresponding row.

A.29 VSS-600—PENDING SETTLEMENT REPORT (DEFERRED SETTLEMENT ONLY)

A.29.1 VSS-600 Frequency

Daily.

A.29.2 VSS-600 Highlights

This report lists the transactions pending settlement by settlement type (Brazil) or payment mode (Japan).

Within settlement type and payment mode, transactions are reported by business transaction type and processing date (the date on which the transactions will settle).

Reversals, chargebacks, and representments are reported separately and are not included with settlement type and payment mode.

A.29.3 VSS-600 Reconciliation Process

The totals for each business mode equal the total for the business mode from the previous processing day, plus the total To Deferred for the business mode on the VSS reconciliation reports (VSS-900, VSS-900-S, VSS-900-P, and VSS-900-PS) minus the total From Deferred for the business mode on the VSS reconciliation reports (VSS-900, VSS-900-S, VSS-900-P, and VSS-900-PS).

A.29.4 VSS-600 Page Break

On business mode.

A.29.5 VSS-600 Totals

Totals are provided at the following levels:

- Settlement type (Brazil) and Payment Mode (Japan)
- Business mode

In addition, subtotals are provided by processing date.

A.29.6 VSS-600 Description

This report provides pending settlement information by SRE.

A.29.7 VSS-600 Sample(s)

The following pages provide samples of the VSS-600 report.

A.29.15 VSS-600 Field Descriptions

The following table provides the field descriptions for the VSS-600 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-16 VSS-600 Field Descriptions

Field Name	Description
Row	
ACQUIRER TRANSACTIONS	Business Mode Business mode description. Business mode can be acquirer, issuer, or other.
01-DAY DEFER	Settlement Type/Payment Mode Settlement type (Brazil) and payment mode (Japan).
PURCHASE	Business Transaction Type
ORIGINAL SALE	Business Transaction Cycle
TOTAL 01-DAY DEFER	Business Transactions Totals Total counts and amounts for the business transaction type.
TOTAL 01-DAY DEFER	Settlement Type (Brazil)/Payment Mode (Japan) Totals Total counts and amounts for the settlement type (Brazil) and payment mode (Japan).
TOTAL ACQUIRER TRANSACTIONS	Business Mode Totals Total counts and amounts for the business mode.
Column	
PROCESSING DATE	The date on which the transactions will settle.
COUNT	Number of pending transactions.
TRANSACTION AMOUNT	Interchange value of the pending transactions.
INTERCHANGE FEE	Reimbursement fees assessed on the transactions.
PROCESSING CHARGE	Visa charges assessed on the transactions.
SETTLEMENT AMOUNT	Amount that will be settled.

A.30 VSS-610—PENDING FEE SETTLEMENT REPORT

A.30.1 VSS-610 Frequency

Daily.

A.30.2 VSS-610 Highlights

This report lists pending reimbursement fees by fee levels within routings for each transaction type. The report sequence structure is as follows:

- Transaction
- Routing
- FEE descriptor

A.30.3 VSS-610 Reconciliation Process

None.

A.30.4 VSS-610 Page Break

By business mode.

A.30.5 VSS-610 Totals

By:

- Business mode
- Business transaction type
- Cycle
- Fee Descriptor

A.30.6 VSS-610 Description

This report provides pending reimbursement fee information in settlement currency.

A.30.7 VSS-610 Sample(s)

The following pages provide samples of the VSS-610 report.

A.31.9 VSS-640 Field Descriptions

Table A-18 VSS-640 Field Descriptions

Field Name	Description
Row	
BUSINESS MODE	Business mode of transactions. Possible business modes are acquirer, issuer, and other.
CHARGE TYPE	Type of charge.
BUSINESS TRANSACTION TYPE	Business transaction type.
CYCLE	Business transaction cycle.
JURISDICTION DESCRIPTION	Jurisdiction of transaction.
ROUTING	From region and to region for interregional transactions. From country and to country for intraregion and domestic transactions.
TOTAL JURISDICTION	Jurisdiction subtotal. Only printed if there are two or more routings within the cycle.
TOTAL CYCLE	Cycle subtotal. Only printed if there are two or more jurisdictions within the cycle.
TOTAL BUSINESS TRANSACTION TYPE	Totals by business transaction. Always printed.
NET BUSINESS TRANSACTION	The difference between charges credits and charges debits for the business transaction type. Net value can be either credits or debits.
TOTAL BUSINESS MODE	Sum of all charges by business mode.
NET BUSINESS MODE	Difference between charges credits and charges debits for the given business mode. Net value can be either credits or debits.
Column	
COUNT	Number of cleared transactions.
INTERCHANGE AMOUNT	Interchange value of transactions on which charges are accessed.
VISA CHARGES CREDITS	Visa charges (credits).
VISA CHARGES DEBITS	Visa charges (debits).

A.32 VSS-900—RECONCILIATION REPORT

A.32.1 VSS-900 Frequency

Daily.

A.32.2 VSS-900 Highlights

Separate detail lines are provided for each of the following:

- **Sent to Visa**—Total transactions sent to Visa during this cycle
- **To Warehouse**—Transactions warehoused for next settlement window
- **To CRS**—Transactions sent to Chargeback Reduction Service
- **To Deferred**—Transactions whose settlement has been deferred until another settlement window
- **From Warehouse Accepted**—Transactions that have been retrieved from warehouse for settlement in this window
- **From CRS Accepted**—Transactions that have been accepted as valid by CRS
- **From Deferred**—Deferred settlement transactions that will be settled in the current settlement window
- **Current Cycle Returned**—Transactions that have been returned to the sender as invalid
- **From CRS Returned**—Transactions that have been rejected by CRS as invalid

Transactions can have the following dispositions:

Table A-19 Transaction Dispositions (VSS-900—Reconciliation Report)

To:	Settlement	Warehouse	Returned	CRS	Deferred
From:					
Member	√	√	√	√	√
Warehouse	√		√		
CRS	√	√	√		√
Deferred	√				
Visa	√		√		

If there is no data for a detail line, that line is suppressed on the report.

The CRS date is printed for all transactions that come from CRS. This is the date that the transaction was originally submitted to Visa.

A.32.3 VSS-900 Reconciliation Process

Count and Clearing Amount reconcile to the Count and Clearing Amount shown on the Interchange Value Report (VSS-120) for each business transaction and cycle.

Only financial transactions are reported on the VSS-120 report.

A.32.4 VSS-900 Page Break

On:

- Clearing currency

> **NOTE**
>
> *Nonmonetary transactions print under the CLEARING CURRENCY: NONE heading. Only counts are displayed for nonmonetary transactions.*

- Business mode

A.32.5 VSS-900 Totals

By:

- Business transaction and cycle
- Business transaction

A.32.6 VSS-900 Description

The VSS-900 report provides the totals of the transaction count and clearing amount for each SRE by clearing currency, business mode, and business transaction type.

A.32.7 VSS-900 Sample(s)

The following pages provide samples of the VSS-900 report.

A.32.14 VSS-900 Field Descriptions

The following table provides the field descriptions for the VSS-900 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-20 VSS-900 Field Descriptions

Field Name	Description
Row	
BUSINESS MODE	Business mode can be acquirer, issuer, or other.
PURCHASE	Business transaction type.
ORIGINAL SALE	Business transaction cycle.
SENT TO VISA	Cleared transactions that were sent to Visa.
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa and received from Visa and sent to settlement.
TO HOLDOVER	Cleared transaction that were sent to holdover, including transactions sent to the Chargeback Reduction Service (CRS) or to the warehouse.
FROM HOLDOVER	Transactions sent from holdover into settlement. This listing includes transactions that were accepted from the CRS or from the warehouse for settlement. Transactions that were returned from the CRS or from the warehouse are also listed here. Returned transactions are also listed under the Received From Visa category as a negative amount.
NONFINANCIAL SENT TO VISA	Nonfinancial transactions that were sent to Visa.
FROM CRS ACCEPTED	Transactions that were accepted for settlement from CRS.
TOTAL NONFINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa. The latter field is not shown on this sample report.
TOTAL TRANSACTIONS	Total of all transactions in the category.
RECEIVED FROM VISA	Cleared transactions that were received from Visa.
Column	
CRS DATE	Date the transaction was originally submitted to Visa.
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial, and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

A.33 VSS-900-M—MONTHLY RECONCILIATION REPORT

A.33.1 VSS-900-M Frequency

Monthly.

A.33.2 VSS-900-M Highlights

The from and to date that appear in the report heading indicate the first and last days of the month for which date was accumulated.

A.33.3 VSS-900-M Reconciliation Process

Count and Clearing Amount reconcile to the Count and Clearing Amount shown on the Interchange Value Report (VSS-120) for each business transaction and cycle.

Only financial transactions are reported on the VSS-120 report.

A.33.4 VSS-900-M Page Break

On:

- Clearing currency

> **NOTE**
>
> *Nonmonetary transactions print under the CLEARING CURRENCY: NONE heading. Only counts are displayed for nonmonetary transactions.*

- Business mode

A.33.5 VSS-900-M Totals

By:

- Business transaction and cycle
- Business transaction

A.33.6 VSS-900-M Description

The VSS-900-M is a monthly report that provides the totals of the transaction count and clearing amount for each SRE by clearing currency, business mode, and business transaction type.

A.33.7 VSS-900-M Sample(s)

A.33.14 VSS-900-M Field Descriptions

For field descriptions of the VSS-900-M report, refer to the field descriptions section of the VSS-900 report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.34 VSS-900-P—PROCESSOR RECONCILIATION REPORT

A.34.1 VSS-900-P Frequency

Daily.

A.34.2 VSS-900-P Highlights

The SRE ID field contains all 9s when a BIN has more than one SRE. For example, the BIN is broken out by account range or the BIN participates in a national settlement service.

A.34.3 VSS-900-P Reconciliation Process

This report together with the VSS-900-PS report enables processors to reconcile items cleared to items settled.

Count and clearing amount reconcile to the count and clearing amount shown on the VSS-120 report for all business transactions and cycles.

The mapping of the BIN to the SRE is shown on the VSS-100-W or VSS-100-R report.

A.34.4 VSS-900-P Page Break

On:

- BIN
- Clearing currency
- Settlement service
- Business mode

A.34.5 VSS-900-P Totals

By:

- Business transaction cycle
- Business transaction type

Totals are provided for each BIN. If there is more than one BIN included on this report, totals are provided across all BINs. When this information is presented, the reporting BIN in the report header is set to ALL.

A.34.6 VSS-900-P Description

The VSS-900-P report provides the summarized totals of transaction counts and clearing amounts for each BIN that is processed by a processor. Amounts are provided by BIN, clearing currency, settlement service, business mode, and business transaction.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.34.7 VSS-900-P Sample(s)

The following pages provide samples of the VSS-900-P report.

A.34.24 VSS-900-P Field Descriptions

The following table provides the field descriptions for the VSS-900-P report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-21 VSS-900-P Field Descriptions

Field Name	Description
Row	
CLEARING CURRENCY	Clearing currency code.
SETTLEMENT SERVICE	Settlement service under which transactions were settled.
BUSINESS MODE	Business mode can be acquirer, issuer or other.
PURCHASE	Business Transaction Type
ORIGINAL SALE	Business Transaction Cycle
RECEIVED FROM VISA	Cleared transactions that were received from Visa.
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa and received from Visa and sent to settlement.
SENT TO VISA	Cleared transactions that were sent to Visa.
TO HOLDOVER	Cleared transactions that were sent to holdover. This includes transactions sent to the Chargeback Reduction Service (CRS) or to the warehouse.
FROM HOLDOVER	Transactions that were sent from holdover into settlement. This includes transactions that were accepted from the CRS or from the warehouse for settlement. Transactions that were returned from the CRS or from the warehouse are also listed. Returned transactions are listed under the Received From Visa category as a negative amount.
TOTAL SENT TO VISA [nonfinancial]	Total count for nonfinancial transactions that were sent to Visa. This is calculated as Nonfinancial Sent to Visa minus To Holdover plus From Holdover.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of transactions for the category.
NON-FINANCIAL TRANSACTIONS SENT TO VISA	Nonfinancial transactions that were sent to Visa.
NON-FINANCIAL TRANSACTIONS RECEIVED FROM VISA	Nonfinancial transactions that were received from Visa
Column	
CRS DATE	Date the transaction was originally submitted to Visa.
COUNT	Number of transactions for the row.

Table A-21 VSS-900-P Field Descriptions (continued)

Field Name	Description
CLEARING AMOUNT	Clearing amount for the row.
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

A.35 VSS-900-PM—MONTHLY PROCESSOR RECONCILIATION REPORT

A.35.1 VSS-900-PM Frequency

Monthly

A.35.2 VSS-900-PM Highlights

The from and to date that appear in the report heading indicate the first and last days of the month for which date was accumulated.

A.35.3 VSS-900-PM Reconciliation Process

This report together with the VSS-900-PS report enables processors to reconcile items cleared to items settled. Count and clearing amount reconcile to the count and clearing amount shown on the VSS-120 report for all business transactions and cycles.

A.35.4 VSS-900-PM Page Break

On:

- BIN
- Clearing currency
- Settlement service
- Business mode

A.35.5 VSS-900-PM Totals

By:

- Business transaction cycle
- Business transaction type

Totals are provided for each BIN. If there is more than one BIN included on this report, totals are provided across all BINs. When this information is presented, the reporting BIN in the report header is set to ALL.

A.35.6 VSS-900-PM Description

The VSS-900-PM is a monthly report that provides the summarized totals of transaction counts and clearing amounts for each BIN that is processed by a processor. Amounts are provided by BIN, clearing currency, settlement service, business mode, and business transaction.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.35.7 VSS-900-PM Sample(s)

The following pages provide samples of the VSS-900-PM report.

A.35.24 VSS-900-PM Field Descriptions

For field descriptions of the VSS-900-PM report, refer to the field descriptions section of the VSS-900-P report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.36 VSS-900-PS—PROCESSOR SUMMARY RECONCILIATION REPORT

A.36.1 VSS-900-PS Frequency

Daily.

A.36.2 VSS-900-PS Highlights

The SRE ID field contains all nines when a BIN has more than one SRE. For example, the BIN is broken out by account range or the BIN participates in a national settlement service.

A.36.3 VSS-900-PS Reconciliation Process

This report together with the VSS-900-P report enables processors to reconcile items cleared to items settled.

Totals of clearing currency across all settlement services reconcile to totals shown on the BASE II Edit Package reports.

Totals for each business mode, settlement service, and clearing currency reconcile to totals shown on the SMS detail reports.

A.36.4 VSS-900-PS Page Break

On:

- Business mode
- Clearing currency
- Settlement service
- BIN

A.36.5 VSS-900-PS Totals

By:

- Business mode
- Settlement service
- Clearing currency

Totals are provided for each BIN. If there is more than one BIN included on this report, totals are provided across all BINs. When this information is presented, the BIN at the top of the report is set to ALL.

A.36.6 VSS-900-PS Description

The VSS-900-PS report provides the summarized totals of transaction counts and clearing amounts for each BIN that is processed by a processor.

Amounts are provided by BIN, clearing currency, settlement service, business mode, and business transaction.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.36.7 VSS-900-PS Sample(s)

The following pages provide samples of the VSS-900-PS report.

A.36.23 VSS-900-PS Field Descriptions

The following table provides the field descriptions for the VSS-900-PS report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-22 VSS-900-PS Field Descriptions

Field Name	Description
Row	
CLEARING CURRENCY	Clearing currency code.
SETTLEMENT SERVICE	Settlement service under which transactions were settled.
RECEIVED FROM VISA	Cleared transactions that were received from Visa.
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa and received from Visa and sent to settlement.
TOTAL	Total BIN otal counts for the clearing BIN (all clearing currencies).
SENT TO VISA	Cleared transactions that were sent to Visa.
TO HOLDOVER	Cleared transactions that were sent to holdover. This includes transactions sent to the Chargeback Reduction Service (CRS) or to the warehouse.
FROM HOLDOVER	Transactions that were sent from holdover into settlement. This listing includes transactions that were accepted from the CRS or from the warehouse for settlement. Transactions that were returned from the CRS or from the warehouse are also listed. Returned transactions are also listed under the Received From Visa category as a negative amount.
TOTAL CLEARING CURRENCY	Total counts and amounts for the clearing currency.
TOTAL ACQUIRER TRANSACTIONS	The total amount of acquirer transactions.
SENT TO VISA	Nonfinancial transactions that were sent to Visa.
RECEIVED FROM VISA	Nonfinancial transactions that were received from Visa.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of transactions for the category.
TOTAL SENT TO VISA	Total count for nonfinancial transactions that were sent to Visa. This is calculated as Nonfinancial Sent To Visa minus To Holdover plus From Holdover.
Column	
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.

Table A-22 VSS-900-PS Field Descriptions (continued)

Field Name	Description
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total clearing amount printed for total rows.

A.37 VSS-900-S—SUMMARY RECONCILIATION REPORT

A.37.1 VSS-900-S Frequency

Daily.

A.37.2 VSS-900-S Highlights

Not applicable.

A.37.3 VSS-900-S Reconciliation Process

This report together with the VSS-900 report enables members to reconcile items cleared to items settled. Totals for each business mode and clearing currency reconcile to the totals shown on the SMS detail reports.

A.37.4 VSS-900-S Page Break

On:

- Clearing currency
- Business mode

A.37.5 VSS-900-S Totals

By:

- Business mode
- Clearing currency
- All

A.37.6 VSS-900-S Description

The VSS-900-S report provides the summarized totals of transaction counts and clearing amounts for each SRE by clearing currency.

Information is totaled across all business transaction types.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.37.7 VSS-900-S Sample(s)

The following pages provide samples of the VSS-900-S report.

A.37.13 VSS-900-S Field Descriptions

The following table provides the field descriptions for the VSS-900-S report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Table A-23 VSS-900-S Field Descriptions

Field Name	Description
Row	
TOTAL ACQUIRER TRANSACTIONS	Total Business Mode Total counts and amounts for the business mode.
SENT TO VISA	Cleared transactions that were sent to Visa.
SENT TO VISA AND SENT TO SETTLEMENT	Total count and amount for transactions that were sent to Visa and sent to settlement. This total is calculated as Sent To Visa minus To Holdover plus From Holdover.
TOTAL CLEARING CURRENCY	Total counts and amounts for the clearing currency.
TOTAL	Total counts for the SRE (all clearing currencies).
FROM CRS ACCEPTED	Transactions that were accepted for settlement from the Chargeback Reduction Service (CRS).
TOTAL SENT TO SETTLEMENT	Total transactions sent to Visa and received from Visa and sent to settlement.
TO HOLDOVER	Cleared transaction that were sent to holdover, including transactions sent to the Chargeback Reduction Service (CRS) or to the warehouse.
FROM HOLDOVER	Transactions that were sent from holdover into settlement. This listing includes transactions that were accepted from the CRS or from the warehouse for settlement. Transactions that were returned from the CRS or from the warehouse are also listed. Returned transactions are also listed under the Received From Visa category as a negative amount.
RECEIVED FROM VISA	Cleared transactions that were received from Visa.
TOTAL NON-FINANCIAL	Total of Nonfinancial Sent To Visa Plus Nonfinancial Received From Visa.
TOTAL TRANSACTIONS	Total of Total Sent To Settlement plus Total Nonfinancial.
Column	
COUNT	Number of transactions for the row.
CLEARING AMOUNT	Clearing amount for the row.
TOTAL COUNT	Total count printed for total rows. Total count is printed for Sent To Visa And Sent To Settlement, Received From Visa And Sent To Settlement, Total Sent To Settlement, Total Nonfinancial and Total Transactions rows.
TOTAL CLEARING AMOUNT	Total amount printed for total rows.

A.38 VSS-900-SM—MONTHLY SUMMARY RECONCILIATION REPORT

A.38.1 VSS-900-SM Frequency

Monthly

A.38.2 VSS-900-SM Highlights

The from and to date that appear in the report heading indicate the first and last days of the month for which date was accumulated.

A.38.3 VSS-900-SM Reconciliation Process

This report together with the VSS-900 report enables members to reconcile items cleared to items settled. Totals for each business mode and clearing currency reconcile to the totals shown on the SMS detail reports.

A.38.4 VSS-900-SM Page Break

On:

- Clearing currency
- Business mode

A.38.5 VSS-900-SM Totals

By:

- Business mode
- Clearing currency
- All

A.38.6 VSS-900-SM Description

The VSS-900-SM is a monthly report that provides the summarized totals of transaction counts and clearing amounts for each SRE by clearing currency.

Information is totaled across all business transaction types.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.38.7 VSS-900-SM Sample(s)

The following pages provide samples of the VSS-900-SM report.

A.38.13 VSS-900-SM Field Descriptions

For field descriptions of the VSS-900-S report, refer to the field descriptions section of the VSS-900-SM report. For information on header fields, refer to the Common Header Data Element Descriptions table.

A.39 VSS-900-XM—MONTHLY PROCESSOR RECONCILIATION REPORT

A.39.1 VSS-900-XM Frequency

Monthly.

A.39.2 VSS-900-XM Highlights

The from and to date that appear in the report heading indicate the first and last days of the month for which date was accumulated.

A.39.3 VSS-900-XM Reconciliation Process

This report together with the VSS-900-P report enables processors to reconcile items cleared to items settled. Totals of clearing currency across all settlement services reconcile to totals shown on the BASE II Edit Package reports. Totals for each business mode, settlement service, and clearing currency reconcile to totals shown on the SMS detail reports.

A.39.4 VSS-900-XM Page Break

On:

- Business mode
- Clearing currency
- Settlement service
- BIN

A.39.5 VSS-900-XM Totals

By:

- Business mode
- Settlement service
- Clearing currency

Totals are provided for each BIN. If there is more than one BIN included on this report, totals are provided across all BINs. When this information is presented, the BIN at the top of the report is set to ALL.

A.39.6 VSS-900-XM Description

The VSS-900-XM is a monthly report that provides the summarized totals of transaction counts and clearing amounts for each BIN that is processed by a processor.

Amounts are provided by BIN, clearing currency, settlement service, business mode, and business transaction.

The information is presented using the same disposition categories as used on the VSS-900 report.

A.39.7 VSS-900-XM Sample(s)

The following pages provide samples of the VSS-900-XM report.

A.39.22 VSS-900-XM Field Descriptions

For field descriptions of the VSS-900-XM report, refer to the field descriptions section of the VSS-900-S report. For information on header fields, refer to the Common Header Data Element Descriptions table.

Appendix B

VSS Reports—Machine-Readable Formats

This appendix contains the record formats for the machine-readable VisaNet Settlement Service (VSS) reports.

Machine-readable (TC 46) records are organized by report. Each report line of data is comprised of one or two records, depending on the transaction format used. Common report information appears in the first record for each report line of data. If a second record is required, the common report information is not included in that record. The transaction format used for the machine-readable record depends on the report.

Each record begins with a “46” (positions 1 and 2), and all reports belong to Report Group “V” (position 59). There are nine different transaction formats, which are identified by Report Subgroup (position 60). All transaction formats consist of one transaction component record (TCR) except for Report Subgroups 4, 6, and 9, which consist of two TCRs. The TCR is identified in Transaction Component Sequence Number (position 4).

Single Message System (SMS)-connected members using a Direct Access Service (DAS) VisaNet Access Point (VAP) for report delivery receive the machine-readable records in the file type of SETLM.

SMS-connected members using non-VAP delivery receive the machine-readable records as a separate transmission. There is no header or trailer record.

BASE II-connected members and SMS-connected members using a BASE II VAP receive the machine-readable records in their Center Transaction File (CTF)—Incoming Interchange.

The following table indicates the applicable Report Subgroup used for each VSS report and the applicable transaction component records (TCRs) for each Report Subgroup.

Report Subgroup	VSS Reports	TCR 0	TCR 1
1	VSS-100-W VSS-100-R	√

Source BIN Positions: 11–16 Length: 6 Format: unpacked numeric	Note: This field will contain zeros.
Reporting for SRE Identifier Positions: 17–26 Length: 10 Format: alphanumeric	Note: This is the identifier for the SRE being reported upon.
Settlement Service Identifier Positions: 27–29 Length: 3 Format: alphanumeric	Note: This field contains the 3-digit code which identifies the Settlement Service used. Possible values for this are included in Appendix C, VSS Codes, in this document.
Report Date Positions: 30–36 Length: 7 Format: unpacked numeric	Note: This field contains the date on which the report was produced. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
SRE Level Number Positions: 37 Length: 1 Format: alphanumeric	Note: This field indicates the level of the Subordinate SRE described by this record in relation to the Reporting for SRE. the possible values are 1 through 8. • A value of 1 indicates that this SRE is the Reporting for SRE. • A value of 2 indicates that this SRE is directly subordinate to the Reporting for SRE. • A value of 3 indicates that this SRE is directly subordinate to the previous level 2 Subordinate SRE. • The maximum value is 8. This indicates that this SRE is directly subordinate to the previous level 7 subordinate SRE.

TC 46 TCR 0 (Report Subgroup 1) TC 46, TCR 0 (Report Subgroup 1) Member Settlement Data Edit Criteria (continued)

Last Change Date Positions: 38–44 Length: 7 Format: unpacked numeric	Note: This contains the date on which the contents of the report were last modified. The format of this date is CCYYDDD, where CC is the century, YY is the year, and DDD is the Julian day. If the field is not applicable, it will contain spaces.
Reserved Positions: 45–58 Length: 14 Format: alphanumeric	Note: This field will contain spaces.
Report Group Positions: 59 Length: 1 Format: alphanumeric	Note: This field will contain a “V”.
Report Subgroup Positions: 60 Length: 1 Format: alphanumeric	Note: This field will contain a 1.
Report Identification Number Positions: 61–63 Length: 3 Format: alphanumeric	Note: This field will contain the value 100.
Report Identification Suffix Positions: 64–65 Length: 2 Format: alphanumeric	Note: This field contains a “W” or “R”.
Subordinate SRE Identifier Positions: 66–75 Length: 10 Format: alphanumeric	Note: This contains the identifier of the SRE represented by this record. It can be either the Reporting for SRE itself or one of its subordinates. The SRE Level Number field indicates the level in the reporting hierarchy for this SRE.
Subordinate SRE Name Positions: 76–90 Length: 15 Format: alphanumeric	Note: This contains the name corresponding to the Subordinate SRE Identifier.
Funds Transfer Indicator Positions: 91 Length: 1 Format: alphanumeric	Note: This contains a “Y” if the subordinate SRE is a Funds Transfer SRE or an “N” if the subordinate SRE is not a Funds Transfer SRE.
Clearing Entity Identifier Type Positions: 92 Length: 1 Format: alphanumeric	Note: The possible values for this field are: A = Card Account Range B = BIN P = Processor Charges SRE Space when the Processor Specified Indicator contains an “N”.

TC 46 TCR 0 (Report Subgroup 1) TC 46, TCR 0 (Report Subgroup 1) Member Settlement Data Edit Criteria (continued)

Clearing Entity Identifier 1 Positions: 93–110 Length: 18 Format: unpacked numeric	Note: The possible values for this field are: • Starting value for a card account range if the Clearing Entity Identifier Type contains an "A". • BIN number in the last six digits if the Clearing Entity Identifier Type contains a "B". • This field will contain space when the Clearing Entity Identifier Type contains a "P".
Clearing Entity Identifier 2 Positions: 111–128 Length: 18 Format: unpacked numeric	Note: The possible values for this field are: • Ending value for a card account range if the Clearing Entity Identifier Type contains an "A". • space if the Clearing Entity Identifier Type contains a "B".
Processor Specified Indicator Positions: 129 Length: 1 Format: alphanumeric	Note: This field contains a "Y" if the Processor Identifier is specified or an "N" if the Processor Identifier is not specified.
Processor Identifier Positions: 130–139 Length: 10 Format: unpacked numeric	Note: When the Processor Specified Indicator field contains a "Y", this field contains the processor identifier used to match transactions to this Subordinate SRE. Otherwise, this field contains a space.
Network Specified Indicator Positions: 140 Length: 1 Format: alphanumeric	Note: This field contains a "Y" if the Network Identifier is specified or an "N" if the Network Identifier is not specified.
Network Identifier Positions: 141–144 Length: 4 Format: unpacked numeric	Note: When the Network Specified Indicator field contains a "Y", this field contains the network identifier used to match transactions to this Subordinate SRE. Otherwise, this field contains a space. When this field contains all 9s, network = ALL will be displayed on the report. This condition occurs when no specific network was specified when the SRE was established.
Settlement Currency Positions: 145–147 Length: 3 Format: unpacked numeric	Note: This field contains the settlement currency (unpacked numeric).
Transaction Currency Acquirer Perspective Positions: 148–150 Length: 3 Format: unpacked numeric	Note: This field will contain transaction currency from the acquirer perspective. If no transaction currency has been specified, this field will contain spaces.
Transaction Currency Issuer Perspective Positions: 151–153 Length: 3 Format: unpacked numeric	Note: This field will contain transaction currency from the issuer perspective. If no issuer transaction currency is specified, this field will contain spaces.
Reserved Positions: 154–167 Length: 14 Format: alphanumeric	Note: This field contains a space.

TC 46 TCR 0 (Report Subgroup 1) TC 46, TCR 0 (Report Subgroup 1) Member Settlement Data Edit Criteria (continued)

Report Identification Number Positions: 61–63 Length: 3 Format: alphanumeric	Note: This field will contain 110 or 111.
Report Identification Suffix Positions: 64–65 Length: 2 Format: alphanumeric	Note: The possible values for this field are space or “M”.
Settlement Date Positions: 66–72 Length: 7 Format: unpacked numeric	Note: If the Report Identification Suffix contains a space, this contains the date for which settlement was performed. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. If the Report Identification Suffix contains an "M", then this field contains spaces. If the Report Identification field contains 111 and the No Data field contains “Y”, then this field contains zeros.
Report Date Positions: 73–79 Length: 7 Format: alphanumeric	Note: This contains the date on which the report was produced. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
From Date Positions: 80–86 Length: 7 Format: unpacked numeric	Note: This field contains the starting range for information on the report when the Report Identification Suffix contains an "M" or the Report Identification Number is 111. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. If the No Data field contains “Y”, then this field contains spaces or “9999000”.

TC 46 TCR 0 (Report Subgroup 2) TC 46, TCR 0 (Report Subgroup 2) Member Settlement Data Edit Criteria (continued)

To Date Positions: 87–93 Length: 7 Format: unpacked numeric	Note: When the Report Identification Suffix contains an "M" or the Report Identification Number contains 111, then this contains the ending range for information contained in the report. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. If the Report Identification field contains 111 and the No Data field contains “Y”, then this field will contain zeros. Otherwise, this field contains a space
Amount Type Positions: 94 Length: 1 Format: alphanumeric	Note: When the Report Identification Number is 110, then the possible values for this field are: I = Interchange F = Reimbursement Fees C = Visa Charges T = Total When the Report Identification Number is 111, then the possible values for this field are: Space = Daily Settlement Position T = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields. If the No Data Indicator = Y, this field will contain space.
Business Mode Positions: 95 Length: 1 Format: alphanumeric	Note: The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the Credit Amount, Debit Amount, and Net Amount fields. If the No Data Indicator = "Y", or if the Report Identification Number field contains 111, then this field will contain spaces.
Count Positions: 96–110 Length: 15 Format: alphanumeric	Note: When the Amount Type contains an "I", this field contains the interchange transaction count corresponding to Business Mode. Otherwise, this field contains a space. If the No Data Indicator = "Y", or if the Report Identification Number field contains 111 , then this field will contain spaces.
Credit Amount Positions: 111–125 Length: 15 Format: alphanumeric	Note: This field contains the Credit Amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = "Y", or if the Report Identification Number field contains 111, then this field will contain spaces.
Debit Amount Positions: 126–140 Length: 15 Format: alphanumeric	Note: This field contains the Debit Amount corresponding to the Amount Type and Business Mode. The number of decimal places for this field depends on the currency. If the No Data Indicator = "Y", or if the Report Identification Number field contains 111, then this field will contain spaces.

TC 46 TCR 0 (Report Subgroup 2) TC 46, TCR 0 (Report Subgroup 2) Member Settlement Data Edit Criteria (continued)

Net Amount Positions: 141–155 Length: 15 Format: alphanumeric	Note: This field contains the net of the credit amount minus the debit amount. If the Amount Type = "T" and the Business Mode = 9, then this field contains the net settlement amount for the Reporting for SRE. If the Report Identification Number is 111, then this field contains the net settlement position. The number of decimal places for this field depends on the currency. If the No Data Indicator = "Y", this field will contain spaces.
Net Amount Sign Positions: 156–157 Length: 2 Format: alphanumeric	Note: The Net Amount Sign is DB for debit or CR for credit. If Net Amount contains zeros, or spaces, then this field will contain spaces. If the No Data Indicator = "Y", this field will contain spaces.
Funds Transfer Date Positions: 158–164 Length: 7 Format: alphanumeric	Note: If the Report Identification Number is “111” and the amount type is space and the No Data field is space, this contains the Funds Transfer date. The format of the date is CCYYDDD where CC is the century, YY is the year and DDD is the Julian day. If the Report Identification Number is “110” or if the Report Identification Number is “111” and amount type is “T”, then this field contains spaces.
Reserved Positions: 165–167 Length: 3 Format: alphanumeric	Note: This field contains spaces.
Reimbursement Attribute Positions: 168 Length: 1 Format: alphanumeric	Note: This field contains a 0 (zero).

One TC 46, TCR 0 record is created for each report line written. In the case of the VSS-115 report, detail report lines are summarized according to the rules described in the following table.

Table B-1 VSS-115 Report Summarization Criteria

Report Row Description	TC 46 Fields			Notes
	Business Transaction Type	Business Transaction Cycle	Reversal Indicator	
Business Transaction Description	Business Transaction Code	1	N	Contains all original (cycle 0 or 1) transactions that are not reversals
REVERSAL	Space	Space	Y	Contains all reversal transactions
CHARGEBACK	Space	2	N	Contains all chargeback (cycle = 2) and second chargeback (cycle = 4) transactions that are not reversals
REPRESENTMENT	Space	3	N	Contains all representment (cycle = 3) transactions that are not reversals
ADJUSTMENT	Space	5	N	Contains all debit adjustment (cycle = 5) and credit adjustment (cycle = 6) transactions that are not reversals

For more information on this report, refer to Appendix A, VSS Reports—Print-Ready Formats.

Source BIN Positions: 11–16 Length: 6 Format: unpacked numeric	Note: This field will contain zeros.
Reporting for SRE Identifier Positions: 17–26 Length: 10 Format: alphanumeric	Note: This field contains the identifier for the SRE being reported upon.
Rollup To SRE Identifier Positions: 27–36 Length: 10 Format: alphanumeric	Note: This field will contain the identifier for the SRE that is directly superior to the Reporting for SRE in the settlement hierarchy. If the Reporting for SRE is the highest SRE in the settlement hierarchy, then this field will contain the same value as the Reporting for SRE identifier.
Funds Transfer SRE Identifier Positions: 37–46 Length: 10 Format: alphanumeric	Note: When funds transfer entity for the Reporting for SRE is the same as the Reporting for SRE or is at a level in the settlement hierarchy that is superior to the Reporting for SRE, then this field will contain the SRE identifier for the funds transfer entity. Otherwise, this field contains a space.
Settlement Service Identifier Positions: 47–49 Length: 3 Format: unpacked numeric	Note: This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in Appendix C, VSS Codes, in this document.

TC 46 TCR 0 (Report Subgroup 4) TC 46, TCR 0 (Report Subgroup 4) Member Settlement Data Edit Criteria (continued)

Settlement Currency Code Positions: 50–52 Length: 3 Format: alphanumeric	Note: This field contains the ISO numeric currency in which settlement amounts are reported. Possible values for this field are available in the BASE II Clearing Data Codes manual and in the *V.I.P. System BASE I Technical Specifications* manual. If the No Data Indicator = Y, this field will contain space.
Clearing Currency Code Positions: 53–55 Length: 3 Format: alphanumeric	Note: When the Report Identification Number contains 120 or 210, this field contains the ISO numeric currency in which clearing amounts are reported. Possible values for this field are available in the BASE II Clearing Data Codes manual and in the *V.I.P. System BASE I Technical Specifications* manual. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Business Mode Positions: 56 Length: 1 Format: alphanumeric	Note: The possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total This code designates the type of value contained in the amount fields on the TCR 1. If the No Data Indicator = Y, this field will contain space.
No Data Indicator Positions: 57 Length: 1 Format: alphanumeric	Note: The possible values for this field are “Y” or space, if there is no data for this report. If the value is “Y”, then no TCR 1 is produced for this report.
Reserved Positions: 58 Length: 1 Format: alphanumeric	Note: This field contains a space.
Report Group Positions: 59 Length: 1 Format: alphanumeric	Note: This field will contain a “V”.
Report Subgroup Positions: 60 Length: 1 Format: alphanumeric	Note: This field will contain a 4.
Report Identification Number Positions: 61–63 Length: 3 Format: alphanumeric	Note: The possible values for this field are: 120, 130, 131, 135, 136, 140, 210, 215, 230, or 640..
Report Identification Suffix Positions: 64–65 Length: 2 Format: alphanumeric	Note: The possible values for this field are space or “M”.

TC 46 TCR 0 (Report Subgroup 4) TC 46, TCR 0 (Report Subgroup 4) Member Settlement Data Edit Criteria (continued)

Settlement Date Positions: 66–72 Length: 7 Format: alphanumeric	Note: If the Report Identification Suffix contains a space, this contains the date for which settlement was performed. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. If the Report Identification Suffix contains an “M”, this field contains zeros.
Report Date Positions: 73–79 Length: 7 Format: alphanumeric	Note: This contains the date on which the report was produced. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
From Date Positions: 80–86 Length: 7 Format: alphanumeric	Note: When the Report Identification Suffix contains an “M”, this contains the starting range for information contained in the report. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. Otherwise, this field contains a space.
To Date Positions: 87–93 Length: 7 Format: alphanumeric	Note: When the Report Identification Suffix contains an “M”, this contains the ending range for information contained in the report. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day. Otherwise, this field contains a space.
Charge Type Code Positions: 94–96 Length: 3 Format: alphanumeric	Note: When the Report Identification Number contains 140 or 230, and the Summary Level contains 03, 04, 05, 06, 07, 08, 09, 10,or 011 (the new charge type code for ISA) this field contains the Charge Type Code. Possible values for this field are included in Appendix C, VSS Codes , in this document. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Business Transaction Type Positions: 97–99 Length: 3 Format: alphanumeric	Note: When the Report Identification Number contains 120, 130, 140, 210 or 230 and the Summary Level contains 05, 06, 07, 08, 09, or 10 this field contains the Business Transaction Type. Possible values for this field are included in Appendix C, VSS Codes , in this document. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Business Transaction Cycle Positions: 100 Length: 1 Format: alphanumeric	Note: When the Report Identification Number contains 120, 130, 140, 210 or 230 and the Summary Level contains 07, 08, 09, or 10, this field contains the Business Transaction Cycle. Possible values for this field are included in Appendix C, VSS Codes, in this document. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Reversal Indicator Positions: 101 Length: 1 Format: alphanumeric	Note: When the Report Identification Number contains 120, 130, 140, 210 or 230 and the Summary Level contains 07, 08, 09, or 10, possible values for this field are “Y” or “N”. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.

TC 46 TCR 0 (Report Subgroup 4) TC 46, TCR 0 (Report Subgroup 4) Member Settlement Data Edit Criteria (continued)

Return Indicator Positions: 102 Length: 1 Format: alphanumeric	Note: When the Report Identification Number contains 120 and Summary Level contains 10, possible values for this field are “Y” or “N”. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Jurisdiction Code Positions: 103–104 Length: 2 Format: alphanumeric	Note: When the Report Identification Number contains 130, 135, 140, 210 or 230, this field contains the Jurisdiction Code. Possible values for this field are included in Appendix C, VSS Codes, in this document. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Inter–regional Routing Indicator Positions: 105 Length: 1 Format: alphanumeric	Note: When the Report Identification Number contains 130, 140 or 230 and Summary Level contains 09 or 10, the possible values for this field are “Y” or “N”. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.
Source Country Code Positions: 106–108 Length: 3 Format: alphanumeric	Note: When the Report ID Number contains 130, 140 or 230 and the Interregional Routing Indicator is “N”, this field contains the source country code. Otherwise, this field contains a space. Possible values for this field are available in the BASE II Clearing Data Codes manual and in the *V.I.P. System BASE I Technical Specifications* manual. If the No Data Indicator = Y, this field will contain space.
Destination Country Code Positions: 109–111 Length: 3 Format: alphanumeric	Note: When the Report ID Number contains 130, 140 or 230 and the Inter–regional Routing Indicator is “N”, this field contains the destination country code. Otherwise, this field contains a space. Possible values for this field are available in the BASE II Clearing Data Codes manual and in the *V.I.P. System BASE I Technical Specifications* manual. If the No Data Indicator = Y, this field will contain space.
Source Region Code Positions: 112–113 Length: 2 Format: alphanumeric	Note: When the Report ID Number contains 130, 140 or 230 and the Interregional Routing Indicator is “Y”, this field contains the source region code. Otherwise, this field contains a space. Possible values for this field are available in Appendix C, VSS Codes, in this document. If the No Data Indicator = Y, this field will contain space.
Destination Region Code Positions: 114–115 Length: 2 Format: alphanumeric	Note: When the Report ID Number contains 130, 140 or 230 and the Interregional Routing Indicator is “Y”, this field contains the destination region code. Otherwise, this field contains a space. Possible values for this field are available in Appendix C, VSS Codes, in this document. If the No Data Indicator = Y, this field will contain space.
Fee Level Descriptor Positions: 116–131 Length: 16 Format: alphanumeric	Note: When the Report ID Number contains 130 or 135 and Summary Level contains 10, then this field contains the Fee Level Descriptor. Otherwise, this field contains a space. If the No Data Indicator = Y, this field will contain space.

TC 46 TCR 0 (Report Subgroup 4) TC 46, TCR 0 (Report Subgroup 4) Member Settlement Data Edit Criteria (continued)

CR/DB/NET Indicator Positions: 132 Length: 1 Format: alphanumeric	Note: If the Report Identification Number contains 135 and Summary Level contains 10, then this field will contain one of the following values: C = Credit Line D = Debit Line N = Net Line Otherwise, this field will contain space.
Summary Level Positions: 133–134 Length: 2 Format: alphanumeric	Note: This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Business Mode Total 02 = Business Mode Net 03 = Charge Type Total 04 = Charge Type Net 05 = Business Transaction Total 06 = Business Transaction Net 07 = Business Cycle Total 08 = Jurisdiction Total 09 = Routing Total 10 = Detail Total 11 = Final Total 12 = Final Net If the No Data Indicator = Y, this field will contain space.
Merchant Volume Indicator Positions: 135–136 Length: 2 Format: alphanumeric	Note: This field contains the Merchant Volume Indicator. It is only applicable for the VSS-131, VSS-131-M, and VSS-136 reports. For all other reports, the field will be space. Possible values for this field are: 01–99 = percentage of discount
Reserved Positions: 137–167 Length: 31 Format: alphanumeric	Note: This field contains a space.
Reimbursement Attribute Positions: 168 Length: 1 Format: alphanumeric	Note: This field contains a 0 (zero).

Clearing Currency Code Positions: 47–49 Length: 3 Format: alphanumeric	Note: This field contains the ISO numeric currency in which the amounts are reported. Possible values for this field are available in the BASE II Clearing Data Codes manual and in the *V.I.P. System BASE I Technical Specifications* manual. This field will contain "NON" if the transactions are nonfinancial. It will contain space if this is the total for all currency codes. If the No Data Indicator = Y, this field will contain space.
Settlement Service Identifier Positions: 50–52 Length: 3 Format: alphanumeric	Note: This field contains the 3-digit code that identifies the Settlement Service used. Possible values for this are included in Appendix C, VSS Codes in this document. This field will contain space if this is the total for all Settlement Services. If the No Data Indicator = Y, this field will contain space.
Business Mode Positions: 53 Length: 1 Format: alphanumeric	Note: When Summary Level contains 06, 07, or 08, the possible values for this field are: 1 = Acquirer 2 = Issuer 3 = Other 9 = Total Otherwise, this field will contain space. This code designates the type of value contained in the amount field. If the No Data Indicator = Y, this field will contain space.
No Data Indicator Positions: 54 Length: 1 Format: alphanumeric	Note: The possible values for this field are "Y" or space, if there is no data for this report.
Reserved Positions: 55–58 Length: 4 Format: alphanumeric	Note: This field contains a space.
Report Group Positions: 59 Length: 1 Format: alphanumeric	Note: This field will contain a "V".
Report Subgroup Positions: 60 Length: 1 Format: alphanumeric	Note: This field will contain the a 6.
Report Identification Number Positions: 61–63 Length: 3 Format: alphanumeric	Note: The possible values for this field are: 900 and 910.

TC 46 TCR 0 (Report Subgroup 6) TC 46, TCR 0 (Report Subgroup 6) Member Settlement Data Edit Criteria (continued)

Report Identification Suffix Positions: 64–65 Length: 2 Format: alphanumeric	Note: The possible values for this field are: Space, “S”, “P”, “PS”, “M”, “SM”, “PM”, or “XM”..
Settlement Date Positions: 66–72 Length: 7 Format: alphanumeric	Note: This field contains the date for which settlement was performed. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
Report Date Positions: 73–79 Length: 7 Format: alphanumeric	Note: This contains the date on which the report was produced. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
Financial Indicator Positions: 80 Length: 1 Format: alphanumeric	Note: This field contains a “Y” if the Business Transaction Type is financial. Otherwise, this field contains an “N”. If the No Data Indicator = Y, this field will contain space.
Clearing Only Indicator Positions: 81 Length: 1 Format: alphanumeric	Note: This field contains a “Y” if the transactions are clearing only. Otherwise, this field contains an “N”. If the No Data Indicator = Y, this field will contain space.
Business Transaction Type Positions: 82–84 Length: 3 Format: alphanumeric	Note: This field contains the Business Transaction Type. When Summary Level contains 07 or 08, possible values for this field are included in Appendix C, VSS Codes, in this document. Otherwise, this field will contain space. If the No Data Indicator = Y, this field will contain space.
Business Transaction Cycle Positions: 85 Length: 1 Format: alphanumeric	Note: This field contains the Business Transaction Cycle. When Summary Level contains 08, possible values for this field are included in Appendix C, VSS Codes, in this document. Otherwise, this field will contain space. If the No Data Indicator = Y, this field will contain space.
Reversal Indicator Positions: 86 Length: 1 Format: alphanumeric	Note: Possible values for this field are “Y” or “N”. If the No Data Indicator = Y, this field will contain space.
Transaction Disposition Positions: 87–88 Length: 2 Format: alphanumeric	Note: This field indicates the disposition of the transactions. Possible values for this field are included in Appendix C, VSS Codes, in this document. If the No Data Indicator = Y, this field will contain space.
Count Positions: 89–103 Length: 15 Format: alphanumeric	Note: This field contains the transaction count. If the No Data Indicator = Y, this field will contain space.
Amount Positions: 104–118 Length: 15 Format: alphanumeric	Note: This field contains the clearing amount corresponding to Business Mode and Transaction Disposition. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y, this field will contain space.

TC 46 TCR 0 (Report Subgroup 6) TC 46, TCR 0 (Report Subgroup 6) Member Settlement Data Edit Criteria (continued)

Amount Sign Positions: 119–120 Length: 2 Format: alphanumeric	Note: The Interchange Value Sign is DB for debit or CR for credit. If the No Data Indicator = Y, this field will contain space. If Amount contains zeros, this field will contain space.
Summary Level Positions: 121–122 Length: 2 Format: alphanumeric	Note: This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Processor Total 02 = BIN Total 03 = Settlement SVC Total 04 = SRE Total 05 = Clearing Currency Total 06 = Business Mode Total 07 = Business Transaction Total 08 = Detail Line 10 = Settlement Type/Payment Mode Total 11 = Financial/Nonfinancial Total Summary levels 10 and 11 is only used when Report Identification Number = '900'. If the No Data Indicator = Y, this field will contain spaces.
CRS Date Positions: 123–129 Length: 7 Format: alphanumeric	Note: This field contains the date on which the transaction was sent to CRS. The format of this date is DDMMMYY where DD is the day, MMM is the alphabetic representation of the month, and YY is the year. If the Report Identification Suffix is "M", "SM", "PM", or "XM", this field will contain a space.
Interchange Reimbursement Fee Positions: 130–144 Length: 15 Format: alphanumeric	Note: This field contains the Reimbursement Fee and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field will contain space. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y, this field will contain space.
Interchange Reimbursement Fee Sign Positions: 145–146 Length: 2 Format: alphanumeric	Note: This field contains the Reimbursement Fee Sign and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field will contain space. The Interchange Reimbursement Fee Sign is DB for debit or CR for credit. If the No Data Indicator = Y, this field will contain space. If the Reimbursement Fee contains zeros, this field will contain space.

TC 46 TCR 0 (Report Subgroup 6) TC 46, TCR 0 (Report Subgroup 6) Member Settlement Data Edit Criteria (continued)

Payment Amount Positions: 147–161 Length: 15 Format: alphanumeric	Note: This field contains the Payment Amount and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field will contain space. The number of decimal places for this field depends on the currency. If the No Data Indicator = Y, this field will contain space. If the Payment Amount contains zeros, this field will contain space.
Payment Amount Sign Positions: 162–163 Length: 2 Format: alphanumeric	Note: This field contains the Payment Amount Sign and is only applicable for Japanese NNSS Deferred Settlement. For non-Japanese NNSS Deferred Settlement, this field will contain space. The Payment Amount Sign is DB for debit or CR for credit. If the No Data Indicator = Y, this field will contain space.
Payment Mode/Settlement Type Positions: 164–166 Length: 3 Format: alphanumeric	Note: This field is only applicable when Report Identification Number = 910 or when the Report Identification Number = 900 and reporting for Brazil NNSS; otherwise the field will contain space. The field will be Payment Mode when the Report Identification Number is 910 and Settlement Type when the number is 910 and reporting for Brazilian NNSS. The possible values of Payment Mode are: 10, 21, 22, 23, 24, 31, 32, 33, 34, 61, 71, 80, and space. The possible values of Settlement Type are: 000, 001, 002, 003, 004, 007, 010, 012, 015, 017, 018, 020, 022, 025, 027, 028, and space.
Installment Payment Indicator Positions: 167 Length: 1 Format: alphanumeric	Note: This field is only valid when the payment mode is 61. The possible values for this field are “2”, “3”, or space. When this field is “2” and payment mode is “61”, these are “installment payment” transactions.
Reimbursement Attribute Positions: 168 Length: 1 Format: alphanumeric	Note: This field will contain a 0 (zero).

TC 46

TCR 1 Report Group = V

Report Subgroup = 6

The TCR 1 will only be produced for VSS-900 series monthly reports only when the Report Identification Number = 900, and the Report Identification Suffix on the TCR 0 = “M”, “SM”, “PM”, or “XM”.

In addition, the TCR 1 will only be attached to the first TCR 0 of the report. The remaining TCR 0s will not have a corresponding TCR 1.

NOTE

There is only one TCR 1 per one monthly report.

Summary Level Positions: 109–110 Length: 2 Format: alphanumeric	Note: This field designates the level of summarization contained in the TC 46 record. Possible values for this field are: 01 = Business Mode Total 02 = Payment Mode/Settlement Type Total 03 = Business Transaction Total 04 = Business Cycle Total
Reversal Indicator Positions: 111 Length: 1 Format: alphanumeric	Note: The possible values for this field are “Y”, “N”, and space. If the No Data Indicator = Y, this field will contain a space.
Install Payment Indicator Positions: 112 Length: 1 Format: alphanumeric	This field is only valid when the payment mode is 61. The possible values for this field are “2”, “3”, or space. When this field is “2” and payment mode is “61”, these are “twice payment” transactions. When this field is “3” and the payment mode is “61”, these are “installment payment” transactions.
Reserved Positions: 113–167 Length: 55 Format: alphanumeric	Note: This field contains a space.
Reimbursement Attribute Positions: 168 Length: 1 Format: alphanumeric	Note: This field will contain a 0 (zero).

Report Date Positions: 31–37 Length: 7 Format: alphanumeric	Note: This contains the date on which the report was produced. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
Reserved Positions: 38–58 Length: 21 Format: alphanumeric	Note: This field contains spaces.
Report Group Positions: 59 Length: 1 Format: alphanumeric	Note: This field will contain a 'V'.
Report Subgroup Positions: 60 Length: 1 Format: alphanumeric	Note: This field will contain an 'A'
Report Identification Number Positions: 61–63 Length: 3 Format: alphanumeric	Note: This field will contain 550.
Report Identification Suffix Positions: 64–65 Length: 2 Format: alphanumeric	Note: This field will contain space. Reserved for future enhancement.
Settlement Indicator Positions: 66 Length: 1 Format: alphanumeric	Note: Possible values for this field are Y or space. If equals to Y, the exception deferred INPA is due to be settled on the current report settlement date.
SRE ID Positions: 67–76 Length: 10 Format: alphanumeric	Note: The SRE of the exception deferred INPA.
Clearing Date Positions: 77–83 Length: 7 Format: alphanumeric	Note: This contains the date on which the exception deferred INPA is cleared. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
Settlement Date Positions: 84–90 Length: 7 Format: alphanumeric	Note: This contains the date on which the exception deferred INPA is supposed to be settled. The format of this date is CCYYDDD where CC is the century, YY is the year, and DDD is the Julian day.
Business Transaction Code Positions: 91–93 Length: 3 Format: alphanumeric	Note: This contains the business transaction code of the exception deferred INPA.

TC 46 TCR 0 (Report Subgroup A) TC 46, TCR 0 (Report Subgroup A) Member Settlement Data Edit Criteria (continued)

Business Transaction Cycle Positions: 94 Length: 1 Format: alphanumeric	Note: This contains the business transaction cycle of the exception deferred NPA. Possible values for this field are included in Appendix C, VSS Codes.
Reversal Indicator Positions: 95 Length: 1 Format: alphanumeric	Note: Possible values for this field are Y or N.
Payment Mode/Settlement Type Positions: 96–98 Length: 3 Format: alphanumeric	Note: Possible values for this field are listed on VSS Reference Guide. This is the Payment Mode (for Japan NNSS) and Settlement Type (for Brazil NNSS) of the deferred INPA. For transactions in Japan NNSS or Brazil NNSS, this field will be blank.
Count Positions: 99–113 Length: 15 Format: alphanumeric	Note: This contains the transaction count of exception deferred INPA.
Amount Positions: 114–128 Length: 15 Format: alphanumeric	Note: This contains the total transaction amount of the exception deferred INPA.
Amount Sign Positions: 129–130 Length: 2 Format: alphanumeric	Note: The Amount Sign is DR for debit and CR for credit.
INPA Type Positions: 131 Length: 1 Format: alphanumeric	Note: Possible values for this field are I, F, and C; where I = Interchange INPA F = Fee INPA, and C = Change INPA
Charge Type Positions: 132–134 Length: 3 Format: alphanumeric	Note: If INPA Type = C (charge type INPA), this will contain the Charge Type of the exception deferred INPA, otherwise, it will be space.
Fee Descriptor Positions: 135–150 Length: 16 Format: alphanumeric	Note: This field contains fee descriptor if the exception deferred INPA is a fee INPA and it is not from the Japan NNSS or Brazil NNSS.
Reserved Positions: 151–168 Length: 18 Format: alphanumeric	Note: This field contains spaces.

Appendix C

VSS Codes

The following VisaNet Settlement Service (VSS) codes listed in this appendix reflect the values used in machine-readable formats:

- Business Transaction Types
- Fee Collection/Funds Disbursement Business Transactions
- Business Transaction Cycle Codes
- Business Modes
- Charge Types
- Jurisdictions
- Regions
- Settlement Services
- Transaction Dispositions

C.1 BUSINESS TRANSACTION TYPES

The following table provides the codes for business transaction types.

Table C-1 Business Transaction Types

Code	Business Transaction Type
100	Purchase
110	VisaPhone
120	Quasi-cash
140	DDS On-Us
141	DDS Participate
142	DDS Merchant Issuer
150	NYCE purchase
151	PULSE purchase
152	STAR purchase
160	NYCE merch return
161	PULSE merch return
162	STAR merch return
170	NYCE preauth
171	PULSE preauth
172	STAR preauth
180	NYCE decline
181	PULSE decline
182	STAR decline
200	Merchandise Credit
210	Quasi-cash Credit
300	Manual Cash

Table C-1 Business Transaction Types (continued)

Code	Business Transaction Type
310	ATM Cash
320	POS Check
330	Card Holder Funds Transfer
400	Payment Order Sendback
410	Payment Order
420	Payment Order Notification
430	Prepaid Loads /Reloads
5xx	Fee Collection Business Transactions (see Table C-2)

THIS PAGE INTENTIONALLY LEFT BLANK.

This appendix provides the following information for each report:

Single Message System (SMS) reports and raw data are available for members connected to SMS.

SMS-connected members may elect to receive SMS reports that detail a member's transaction activity. Subscription is optional for all SMS reports.

The SMS reports are listed in Table D-1. Each of the following categories of the report is then explained and report examples are provided.

- Transaction Detail Reports
- Maintenance Reports
- Reconciliation Reports
- Error Reports

SMS-connected members may also elect to receive raw data records that detail member transaction activity for the processing day. Raw data allows the members to analyze and customize their Single Message System data in the way that best suits their business needs.

Raw data records are listed in Table D-17 to Trailer Record (V22900). For a complete explanation of raw data record content, refer to the BASE I and SMS Technical Specifications manuals.

D.1 WHAT IS NEW IN SMS REPORTS AND RAW DATA

Because the authoring tool, Epic, has expanded formatting capabilities, the two appendixes A and D have undergone significant formatting changes.

Report samples have replaced figures.

Field names (as they appear on the report samples) have replaced numbered flags.

Explanation of report elements now appears as categorized text rather than in a table.

Empty cells in tables have been populated by the term, "Not applicable" to avoid confusion.

The heading, "Data Element Descriptions" has been replaced by "Field Descriptions."

The information formerly presented in each report's "Report Description" has been divided into "Description" and "Field Descriptions."

The acronym "n/a" has been replaced by "Not applicable."

The landscape layout of Appendix D: SMS Reports and Raw Data has replaced the former portrait layout.

D.2 SMS REPORT NUMBERING

SMS reports are identified with a combination of report number and sort criteria in accordance with the following guidelines:

- SMS report numbers begin with a “6” to differentiate them from existing Visa reports.
- The second position of the report number indicates the report category.
  - 60*xx* Transaction Detail Reports
  - 61*xx* Exception Detail reports
  - 62*xx* Maintenance Reports
  - 63*xx* Reconciliation Reports
  - 64*xx* Error Reports
  - 66*xx*–68*xx* Reserved for Future Use
  - 69*xx* Other Reports
- The third position of the report number indicates whether the report is intended for an issuer, an acquirer, or both.
  - Issuer reports have an even number.
  - Acquirer reports have an odd number.
  - Reports that apply to both issuers and acquirers have an even number.
- The final position of the report identifier indicates the sort criteria.

An Issuer Transaction Detail By Cardholder Number Report is numbered as SMS600C, with “C” indicating a cardholder number sort. An Acquirer Chargeback Detail By Retrieval Reference Number Report is identified as SMS611R, with “R” indicating a retrieval reference number sort.

The SMS reports are listed in Table D-1.

NOTE

Members have the option to subscribe to multiple sorts of the same report number.

Sort Key

A = Acquirer ID

C = Card Number

I = Issuer ID

R = Retrieval Reference Number

T = Transmission Date and Time

Table D-1 SMS Reports

Report Number	Report Title and Report Function	Report Sort
SMS600	Issuer Transaction Detail Lists 01*xx*, 02*xx*, and 04*xx* messages processed by VisaNet for the issuer.	A, C, R, T
SMS601	Acquirer Transaction Detail Lists 01*xx*, 02*xx*, and 04*xx* messages processed by VisaNet for the acquirer.	C, I, R, T
SMS608	Fee Collection & Funds Disbursement Detail Lists TC 10s and TC 20s received from BASE II and applied to the issuer or acquirer.	C
SMS610	Issuer Chargeback Detail Lists issuer-initiated chargebacks.	A, C, R
SMS611	Acquirer Chargeback Detail Lists acquirer-processed chargebacks.	C, I, R
SMS612	Issuer Representment Detail Lists issuer-processed representments.	A, C, R
SMS613	Acquirer Representment Detail Lists acquirer-initiated representments.	C, I, R
SMS614	Issuer Adjustment and Merchandise Credit Detail Lists issuer-processed adjustment transactions.	A, C, R

Table D-1 SMS Reports (continued)

Report Number	Report Title and Report Function	Report Sort
SMS615	Acquirer Adjustment and Merchandise Credit Detail Lists acquirer-processed adjustment transactions.	C, I, R
SMS616	Issuer Cancellation and Reversal Detail Lists issuer-initiated-and received cancellations and reversals.	C, R
SMS617	Acquirer Cancellation and Reversal Detail Lists acquirer-initiated-and received cancellations and reversals.	C, R
SMS620	Issuer File Maintenance Daily Summary Lists accepted and rejected Exception File and PIN Verification File updates sent by the issuer.	T
SMS624	Routing Table Update Daily Summary Lists Routing Table additions and deletions by card prefix.	C
SMS626	Administrative Message Daily Summary Lists issuer- or acquirer-processed 06*xx* administrative messages.	R
SMS630	Batch Total Reconciliation Summary Provides processing entities' financial positions by batch for the processing day (exclusive of fees, charges, BASE II transactions, and suspended Chargeback Reduction Service (CRS) transactions)	Not applicable
SMS640	Issuer Error Detail Lists messages rejected by Visa due to edit errors and late responses.	T
SMS641	Acquirer Error Detail Lists messages rejected by Visa due to edit errors and late responses.	T
SMS642	Issuer CRS Returned Exception Detail Lists exception items returned by the Exception Manager due to Chargeback Reduction Service errors.	T
SMS643	Acquirer CRS Returned Exception Detail Lists exception items returned by the Exception Manager due to Chargeback Reduction Service errors.	T

D.3 SMS REPORT DESIGN

To facilitate ease of use, SMS reports are designed to display the same information in the same location from report to report. The header structure is the same on all SMS reports. The header fields are described in Table D-2.

NOTE

SMS reports generate a total and force a page break any time a member reporting level changes (funds transfer SRE, processor, affiliate BIN, or lowest-level SRE).

D.3.1 SMS Reports Common Header

The header for SMS reports contains certain fields that are common to many reports.

```
REPORT ID: SMS6nnx                                VISANET INTEGRATED PAYMENT SYSTEM              PAGE NUMBER         :    nnnnn
FUNDS XFR: nnnnnnnnnn MEMBER SRE - UP TO 26 LETT      SINGLECONNECT / NETWORK NAME               ONLINE SETTLMNT DATE:  ddmmmyy
PROCESSOR: nnnnnnnnnn MEMBER SRE - UP TO 26 LETT  NAME OF REPORT - UP TO 38 LETTERS LONG         RUN DATE            :  ddmmmyy
AFFILIATE: nnnnnnnnnn MEMBER NAME- UP TO 26 LETT       BY APPLICABLE SORT CRITERIA               RUN TIME            : hh:mm:ss
SRE      : nnnnnnnnnn MEMBER SRE - UP TO 26 LETT              NATIONAL NET                        VSS PROCESSING DATE :  ddmmmyy

This Data is Fictitious and for Illustration Purposes Only.
```

D.3.2 SMS Reports Common Header Fields

The following table contains the common header field description for SMS reports. For a description of the unique header fields that apply to a specific report, refer to the field description section of the report.

Table D-2 SMS Reports Header Fields

Field Name	Description
REPORT ID	Report Number; for example, SMS600C
FUNDS XFR	Settlement reporting entity (SRE) and name of funds transfer member
PROCESSOR	BIN, network ID, and name of member's processor
AFFILIATE	BIN, network ID, and name of affiliate member
SRE	Settlement Reporting Entity (SRE): Lowest-level SRE and member name
SYSTEM/NETWORK IDENTIFIER	SingleConnect / System Name (such as Visa, Interlink, Plus)
REPORT TITLE	Report title; for example, Issuer Transaction Detail by Transmission Date and Time
NATIONAL NET	If present, this field indicates that the transactions on this report are settled by National Net.
NATIONAL BILATERAL	If present, this field indicates the transactions on this report are settled by National Bilateral.
PAGE NUMBER	Page number of the report

Table D-2 SMS Reports Header Fields (continued)

Field Name	Description
ONLINE SETTLEMENT DATE	Date the funds are settled by SMS. The cutoff time for transactions that affect settlement is 8:00 p.m. Pacific time for Interlink or 10:00 p.m. Pacific time for Visa, Plus, and other SMS networks.
RUN DATE	Date the report is produced
RUN TIME	Time the report is produced
VSS PROCESSING DATE	Date the funds are processed by VSS

D.4 SMS REPORTING ENTITIES

SMS reports have four levels of reporting entities:

- Funds Transfer settlement reporting entity (SRE)
- Processor
- Affiliate BIN
- Lowest-level SRE

D.4.1 Funds Transfer SRE

The funds transfer SRE is the level at which funds transfer occurs. The funds transfer SRE can be at any level in the VSS hierarchy.

D.4.2 Processor

A processor is a Visa member or a Visa-approved nonmember that provides authorization, clearing, or settlement services for merchants and members. The processor captures transactions counts and amounts online. A running total of counts and amounts is accumulated each half hour. The system stores these totals as advice messages (0520) for recovery by the processor.

D.4.3 Affiliate BIN

The affiliate BIN can be an issuer, an acquirer, or both. Transactions for all card ranges assigned to an affiliate BIN appear on the affiliate BINs report.

NOTE

SMS reports generate a total and force a page break any time a reporting level changes. So, if a member has an affiliate BIN associated with multiple SREs or processors, it may be necessary to add the subtotals to obtain the total activity for an affiliate.

For SMS reports at the affiliate level, the 10-digit number in the header consists of the following:

- The 6-digit BIN of the issuer or acquirer.
- The 4-digit Network ID (0002 for Visa, 0003 for Interlink, 0004 for Plus).

D.4.4 Lowest-Level SRE

The lowest-level SRE is the lowest level at which VSS produces settlement reports. The combination of the funds transfer SRE, processor, and affiliate BIN identifies the lowest-level SRE displayed on the SMS report.

D.5 TRANSACTION DETAIL REPORTS

The SMS transaction detail reports (SMS600–SMS617) cumulatively reflect all of a member's interchange transactions for one processing day. The reports assist the member center to reconcile its position with the V.I.P. System by providing a detailed transaction listing for the issuer or acquirer at the affiliate BIN level. Subtotals are provided for each affiliate BIN. Reports also generate a subtotal and force a page break any time a member reporting level changes. For example, if one affiliate BIN has activity with two processors, the report will have two affiliate subtotals—one for each processor.

Reports are produced daily for delivery to the subscriber. Subscription is optional for all transaction detail reports.

This section contains report samples and field descriptions for the SMS transaction detail reports.

D.5.1 Exception Detail Reports

The SMS exception detail reports (SMS610–SMS617) are a subset of the transaction detail reports. Exception detail reports display a particular category of the member's exception transactions for one processing day. These transactions are also displayed on the SMS600 or SMS601 report. Exception detail reports have the same functionality and fields as the SMS600 and SMS601 reports..Refer to "Exception Detail Reports" section in this appendix.

D.5.2 Other Transaction Detail Reports

The Fee Collection and Funds Disbursement Detail (SMS608) reports have structures different from the other transaction detail reports. The transactions displayed on these reports do not appear on the SMS600 or SMS601 report because of their unique data content. Layouts for these reports are designed to best display the data elements present in either a manual charge or a fee collection/funds disbursement. Tables that explain the fields on these reports appear in the "Other Transaction Detail Reports" section.

D.5.3 Optional Customized Lines

SMS transaction detail reports give members the option to customize the data present on their reports. Transaction detail reports have up to five lines of data that can be displayed for each transaction. Line data is grouped as follows:

- **Line 1**—Primary transaction data (members must receive this line)
- **Line 2**—Tracing and card acceptor identification data
- **Line 3**—Interlink exception tracing data; also reserved for future Chip Card Payment Service (CCPS) data
- **Line 4**—PS2000 and Plus proprietary data
- **Line 5**—Interchange Reimbursement Fee (IRF) data

The following SMS transaction detail reports offer optional customized lines:

- **SMS600**—Issuer Transaction Detail
- **SMS601**—Acquirer Transaction Detail

- **SMS610**—Issuer Chargeback Detail
- **SMS611**—Acquirer Chargeback Detail
- **SMS612**—Issuer Representment Detail
- **SMS613**—Acquirer Representment Detail
- **SMS614**—Issuer Adjustment and Merchandise Credit Detail
- **SMS615**—Acquirer Adjustment and Merchandise Credit Detail
- **SMS616**—Issuer Cancellation and Reversal Detail
- **SMS617**—Acquirer Cancellation and Reversal Detail

If an SMS report offers optional lines, members may subscribe to any combination of lines, but must subscribe to line 1. The default is to receive lines 1 through 4. Note that if a member subscribes to lines 2, 3, 4, or 5 and a transaction does not contain data normally displayed on that line, the line does not print. If a member requests to change the optional lines received on an SMS report, the member should contact their Visa Member Services Representative.

D.5.4 Prototypical Transaction Detail Report

The prototypical transaction detail report example below shows all the fields that can be displayed on a standard transaction detail report. Members may receive up to five lines of transaction detail per transaction.

Two transactions are displayed on the report. The first transaction displayed is identical to the second transaction, with the exception of line 4. On the first transaction, line 4 contains the data elements present for an approved PS2000 transaction as well as the Plus proprietary data elements. Line 4 on the second transaction contains the data associated with a downgraded PS2000 transaction.

The tables following the prototype describe all the data elements in the body of the report. The column fields table describes the fields from left to right. The data line fields table describes the fields line by line, from left to right. Headers on the transaction detail reports are the same as for all other SMS reports. For descriptions of the header fields, see Table D-2

NOTE

The sample report has bold text to highlight headers versus data. Production SMS reports do not have bold text.

D.5.4.1 Sample SMS Transaction Detail Report

The following is a sample of the Transaction Detail Report.

```
REPORT ID: SMS6nnx                                VISANET INTEGRATED PAYMENT SYSTEM              PAGE NUMBER         :    nnnnn

Legend – Field Values

n = Numeric	**x** = Alphanumeric	**a** = Amount	**c** = Count
dd = Day	**mmm** = Month	**yy** = Year	
hh = Hour	**mm** = Minute	**ss** = Second	

D.5.5 Column Headings

The column headings for the SMS transaction detail reports are described in Table D-3.

Table D-3 Transaction Detail Report—Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number
XMIT(GMT)/LOCL DATE TIME	Line 1 contains the transaction's GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
	For merchandise credits and preauthorization completions.	Field 90—Original Data Elements
	Line 2 contains the local date and time of the preauthorized purchase request and merchandise credit.	
	For chargebacks and representments	Field 48, Usage 11 (Local Date and Time of Interlink Preauth Completion Request and Merchandise Credit)
	Line 1 of the transaction is the transaction date and time of the chargeback or representment.	
	Line 2 is the transaction date and time of the original.	
	For Interlink representments only.	Field 125—Supporting Information
	Line 3 indicates the date and time of the original, line 2 the date and time of the chargeback, and line 1 the date and time of the representment.	*Interlink Only*
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
	For chargebacks and representments, line 1 of the transaction is the trace number of the chargeback or representment and line 2 is the trace number of the original.	Field 90—Original Data Elements
	For Interlink representments only	Field 125—Supporting Information.
	Line 1 the trace number of the representment.	*Interlink Only*
	Line 2 the trace number of the chargeback	
	Line 3 indicates the trace number of the original.	

Table D-3 Transaction Detail Report—Column Headings (continued)

Column Heading	Contents	Field Number and Name
ACQRER ID or ISSUER ID	The ID of the institution that is acting as acquirer or issuer.	Field 32—Acquiring Institution ID Code *Issuer ID is determined by Visa*
TERMNL/NAME	TERMNL is the 1-digit terminal type and 1-digit terminal capability. NAME is the Card Acceptor Name/Location. The Card Acceptor field displays the first 25 characters and the last two characters of the field with the two components separated by a slash symbol (/).	Field 60—Additional POS Information Positions 1 and 2 Field 43—Card Acceptor Name/Location
TRAN TYPE	Indicates the 4-digit request message type; for example, an 0200 financial request or an 0400 reversal request.	Not applicable
PROC CODE	The 6-digit processing code.	Field 3—Processing Code
ENT MOD	The 3-digit POS Entry Mode code that indicates the conditions under which the transaction takes place at the point of service.	Field 22—Point of Service Entry Mode Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending an acquirer-generated message or issuer-generated chargeback.	Field 63.3—Message Reason Code
CN	The 2-digit point of service condition code that indicates the condition under which the transaction takes place at the point of service.	Field 25—Point of Service Condition Code
STP	The 4-digit STIP/switch reason code. This code indicates the reason that stand-in processing (STIP) responded on behalf of the member.	Field 63.4—STIP/Switch Reason Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
CARDHOLDER BILLING/TRANSACTION AMT CUR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the cardholder billing/transaction amount.	Field 6—Amount, Cardholder Billing Field 4—Amount, Transaction Field 51—Currency Code, Cardholder Billing Field 49—Currency Code, Transaction
CARDHOLDER BILLING/TRANSACTION AMT CUR	Line 2 displays: Cashback amount (on originals) Preauthorization amount (on preauth completions, when the preauthorized amount is different from the completion amount) Replacement amount (on partial reversals)	Field 61.2—Other Amount, Cardholder Billing

Table D-3 Transaction Detail Report—Column Headings (continued)

Column Heading	Contents	Field Number and Name
CARDHOLDER BILLING/TRANSACTION AMT CUR	On a chargeback Line 2contains the original transaction amount when different than the chargeback amount. For further explanation on the use of fields 6 and 4, see the description on Table D-5.	Field 61.1—Other Amount, Transaction Field 95—Replacement Amount
SETTLEMENT AMOUNT (XXX)	The transaction amount that affects the settlement account. The alphanumeric code in parentheses in the header indicates the settlement currency (for example, USD = U.S. Dollars). After the amount: CR = Credit DR = Debit	Field 5—Amount, Settlement Field 50—Currency Code, Settlement

D.5.6 Data Line Fields

The data line fields for the SMS transaction detail reports are described in Table D-4. For more information on field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

Table D-4 Transaction Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
CA ID:	The 8-character Card Acceptor Terminal ID and the 15-character Card Acceptor ID. The two fields are separated by two spaces.	Field 41—Card Acceptor Terminal Identification Field 42—Card Acceptor Identification Code
ATC:	The 6-digit Application Transaction Counter, used for Chip Card transactions.	Field 137—Application Transaction Counter
CA SQ:	The 3-digit Card Sequence Number, used for Chip Card transactions.	Field 23—Card Sequence Number
TSN:	The 8-character Terminal Serial Number that uniquely identifies the merchant terminal used in Chip Card Payment Service (CCPS) transactions.	Field 133—Terminal Serial Number
CI:	The 3-digit CCPS Indicators—CCPS Transaction Indicator, Card Authentication Reliability Indicator, and CCPS Rate Indicator.	Field 60.7—CCPS Transaction Indicator Field 60.8—Card Authentication Reliability Indicator

Table D-4 Transaction Detail Report Data Line Fields (continued)

Data Line Field	Contents	Field Number and Name
EC:	The 1-digit Electronic Commerce Indicator that identifies the level of security present on Electronic Commerce financial transactions.	Field 63.6—Mail/Telephone or Electronic Commerce Indicator Position 4
USAGE:	The 1-digit Usage Code that indicates whether the transaction is a first or second chargeback or representment.	Field 48, Usage 7a, Position 2 (Usage Code)
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number
DG CD:	The 2-character Downgrade Reason Code. If present, appears instead of the Transaction Identifier.	Field 62.3—Validation Code
ACI:	The one letter Authorization Characteristics Indicator (ACI).	Field 62.1—Authorization Characteristics Indicator
VC:	The 4-character Validation Code.	Field 62.3—Validation Code
PTS:	The Plus Time Stamp, comprised of a 9-digit time and transaction tracing number and the 4-digit local date, both assigned by Plus Systems, Inc.. A space separates the two components.	Field 48, Usage 10 (Time Stamp for Plus Messages)
PMC:	The 6-digit Plus Proprietary Member Center (PMC) ID. On an issuer report, the acquirer's Plus PMC is displayed. On an acquirer report, the issuer's Plus PMC is displayed.	Field 63.3—Plus Proprietary Member Center ID
SCHG:	An ATM surcharge from the acquirer to the issuer. The amount is included in field 4 or field 6 and so is not added to any subtotals.	Field 28—Amount, Transaction Fee
FEE JURIS:	The jurisdiction of the interchange reimbursement fee (IRF) associated with the transaction.	Provided by Visa
ROUTING:	The transaction routing which helps determine the IRF.	Provided by Visa
FEE LEVEL:	The name of the IRF associated with the transaction.	Provided by Visa
FPI:	The 3-digit alphanumeric interchange Fee Program Indicator.	Provided by Visa
ABA:	The 9-digit MICR (Magnetic Ink Character Recognition) information scanned from the check by the POS terminal. Contents will be in parsed Visa format.	Field 125—Supporting Information

NOTE

If a data line field is not present in the message, the accompanying line header does not print.

D.5.7 Amounts on Multicurrency Transactions

SMS transaction detail reports provide members with transaction amounts that include any currency conversion fees. Amount columns on the reports come from different online fields, depending on whether the recipient participates in the Visa Multicurrency Service.

The amount fields displayed on issuer transaction detail reports are explained in the following table.

Table D-5 Amounts Displayed on Issuer Transaction Detail Reports

Multicurrency Participant?	Online Field Displayed in Cardholder Billing Amount Column	Online Field Displayed in Settlement Amount Column
Yes	Field 6—Amount, Cardholder Billing	Field 5—Amount, Settlement
No	Field 4—Amount, Transaction	Field 4—Amount Transaction, minus any currency conversion fees

The following table explains the amounts displayed on acquirer transaction detail reports

Table D-6 Amounts Displayed on Acquirer Transaction Detail Reports

Multicurrency Participant?	Online Field Displayed in Cardholder Billing Amount Column	Online Field Displayed in Settlement Amount Column
Yes	Field 4—Amount, Transaction	Field 5—Amount, Settlement
No	Field 4—Amount, Transaction	Field 4—Amount, Transaction

The following pages provides samples that show how the SMS600 and SMS601 series reports will look if FPI and ABA numbers are present. For descriptions of FPI and ABA, refer to Table D-4.

D.6 SMS600—ISSUER TRANSACTION DETAIL

D.6.1 SMS600 Purpose

Provides a list of 01*xx*, 02*xx*, and 04*xx* messages processed by Visa for the member when the member is acting as an issuer.

D.6.2 SMS600 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.6.3 SMS600 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), Transmission Date and Time (T), and Acquirer ID (A).

D.6.4 SMS600 Description

This report lists the individual 01*xx*, 02*xx*, and 04*xx* transactions processed during the processing day.

Subsets of transactions displayed on this report also appear on the following reports:

- SMS610—Issuer Chargeback Detail
- SMS612—Issuer Representment Detail
- SMS614—Issuer Adjustment and Merchandise Credit Detail
- SMS616—Issuer Cancellation and Reversal Detail

D.6.5 SMS600 Sample(s)

The following pages provide samples for each sort criteria of the SMS600 report.

The categories of transactions displayed on the report examples are explained in Table D-7.

NOTE

The use of different networks in the four report sort options are for illustrative purposes only. The examples should not be interpreted to mean that an issuer who participates in Visa POS must subscribe to the SMS600C. Members are free to choose the sort options that best suit their business needs. Also note that all of the following examples display the same currency in both the cardholder billing amount and settlement amount columns. If an issuer settles in a different currency than the currency in which it bills its cardholders, report amounts will display the appropriate currencies.

D.6.12 SMS600 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Issuer Transaction Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

Table D-7 Issuer Transaction Detal Report Example Content

Tran. Number	SMS600C Network 2 – Visa POS	SMS600R Network 2 – Visa ATM	SMS600T Network 3 – Interlink POS	SMS600A Network 4 – Plus ATM
1	0200 Financial Approval	0220 Representment	0200 Merchandise Credit	0200 Financial Approval
2	0200 Financial Decline	0422 Chargeback	0200 STIP Approval with Cashback	0200 Financial Approval
3	0422 Chargeback	0400 Financial Reversal	0100 Preauthorization	0220 Cash Disbursement Adjustment
4	0220 Representment	0200 International Approval	0200 Preauthorization Completion	0422 Chargeback
5	0100 Authorization	0200 Financial Decline	0200 Store and Forward Resubmission	0220 Representment
6	0220 Deferred Clearing Advice	0200 Financial Approval	0400 Financial Reversal	0400 Financial Partial Reversal
7	0400 Financial Reversal	0220 Cash Disbursement Adjustment	0220 Representment	0200 International Approval
8	0200 International Approval	0200 Financial Approval	0200 Financial Decline	Not applicable

Table D-7 Issuer Transaction Detal Report Example Content (continued)

Tran. Number	SMS600C Network 2 – Visa POS	SMS600R Network 2 – Visa ATM	SMS600T Network 3 – Interlink POS	SMS600A Network 4 – Plus ATM
9	0220 Credit Adjustment (STIP)	0200 Balance Inquiry	0422 Chargeback	Not applicable
10	Not applicable	Not applicable	0200 Financial Approval	Not applicable

D.7 SMS601—ACQUIRER TRANSACTION DETAIL

D.7.1 SMS601 Purpose

Provides a list of 01*xx*, 02*xx*, and 04*xx* messages processed by Visa for the member when the member is acting as an acquirer.

D.7.2 SMS601 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.7.3 SMS601 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.
I	Issuer ID, cardholder number, trace number, and transmission date and time.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), Transmission Date and Time (T), and Issuer ID (I).

D.7.4 SMS601 Description

This report lists the individual 01*xx*, 02*xx*, and 04*xx* transactions processed during the processing day. Subsets of transactions displayed on this report also appear on the following reports:

- SMS610—Acquirer Chargeback Detail
- SMS612—Acquirer Representment Detail
- SMS614—Acquirer Adjustment and Merchandise Credit Detail
- SMS616—Acquirer Cancellation and Reversal Detail

D.7.5 SMS601 Sample(s)

The following pages provide samples for each sort criteria of the SMS601 report.

NOTE

The use of different networks in the four report sort options are for illustrative purposes only. The examples should not be interpreted to mean that an acquirer who participates in Interlink POS must subscribe to the SMS601T. Members are free to choose the sort options that best suit their business needs. Also note that all of the following examples display the same currency in both the transaction amount and settlement amount columns. If an acquirer settles in a different currency than its transaction currency, report amounts will display the appropriate currencies.

D.7.12 SMS601 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Acquirer Transaction Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

The categories of transactions displayed on the report examples are explained in Table D-8.

D.8 EXCEPTION DETAIL REPORTS

This section contains report samples and field descriptions for the SMS exception detail reports.

The following pages provides samples that show how the SMS610 and SMS611 SMS 612, SMS613, SMS614, SMS615, and SMS617 series reports will look if ABA number is present. For description of ABA, refer to Table D-4.

D.9 SMS610—ISSUER CHARGEBACK DETAIL

D.9.1 SMS610 Purpose

Provides a list of chargeback and chargeback reversal messages processed by Visa for the member when the member is acting as an issuer. The issuer uses this report to verify that all chargebacks and chargeback reversals were processed.

D.9.2 SMS610 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.9.3 SMS610 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Acquirer ID (A).

D.9.4 SMS610 Description

This report lists the chargeback and chargeback reversal transactions received by the issuer during the processing day. Transactions displayed on this report also appear on the Issuer Transaction Detail report (SMS600).

D.9.5 SMS610 Sample(s)

The following pages provide samples for each sort criteria of the SMS610 report.

D.9.9 SMS610 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Issuer Transaction Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

NOTE

The SMS610 has a Transaction Amount column instead of the Cardholder Billing Amount column that appears on all other Issuer Transaction Detail Reports. This difference is because on a chargeback, the issuer places the amount to be charged back in Field 4—Amount, Transaction.

D.10 SMS611—ACQUIRER CHARGEBACK DETAIL

D.10.1 SMS611 Purpose

Provides a list of chargeback and chargeback reversal messages processed by Visa for the member when the member is acting as an acquirer. The acquirer uses this report to verify that chargebacks that were received and settled. It is also used to determine whether to accept a chargeback or submit a representment.

D.10.2 SMS611 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.10.3 SMS611 Sort Sequence

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
I	Issuer ID, cardholder number, and trace number.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Issuer ID (I).

D.10.4 SMS611 Description

This report lists the chargeback and chargeback reversal transactions received by the acquirer during the processing day. Transactions displayed on this report also appear on the Acquirer Transaction Detail report (SMS601).

D.10.5 SMS611 Sample(s)

The following pages provide samples for each sort criteria of the SMS611 report.

D.10.9 SMS611 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Acquirer Chargeback Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.11 SMS612—ISSUER REPRESENTMENT DETAIL

D.11.1 SMS612 Purpose

Provides a list of representment messages processed by Visa for the member when the member is acting as an issuer. The issuer uses this report to verify representments that were received and settled.

D.11.2 SMS612 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.11.3 SMS612 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Acquirer ID (A).

D.11.4 SMS612 Description

This report lists the representment transactions received by the issuer during the processing day. Transactions displayed on this report also appear on the Issuer Transaction Detail Report (SMS600).

D.11.5 SMS612 Sample(s)

The following pages provide samples for each sort criteria of the SMS612 report.

D.11.9 SMS612 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Issuer Representment Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.12 SMS613—ACQUIRER REPRESENTMENT DETAIL

D.12.1 SMS613 Purpose

Provides a list of representment messages processed by Visa for the member when the member is acting as an acquirer. The acquirer uses this report to verify representments that were submitted and settled.

D.12.2 SMS613 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.12.3 SMS613 Sort Sequence

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
I	Issuer ID, cardholder number, and trace number.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Issuer ID (I).

D.12.4 SMS613 Description

This report lists the representment transactions submitted by the acquirer during the processing day. Transactions displayed on this report also appear on the Acquirer Transaction Detail Report (SMS601).

D.12.5 SMS613 Sample(s)

The following pages provide samples of the SMS613 report.

D.12.9 SMS613 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-4 and Table D-2.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Acquirer Representment Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.13 SMS614—ISSUER ADJUSTMENT AND MERCHANDISE CREDIT DETAIL

D.13.1 SMS614 Purpose

Provides a list of adjustment and merchandise credit messages processed by Visa for the member when the member is acting as an issuer. The issuer uses this report to verify adjustments to cardholder's accounts submitted because the original transaction did not process correctly or because of merchandise returns.

D.13.2 SMS614 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.13.3 SMS614 Sort Sequence

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
A	Acquirer ID, cardholder number, trace number, and transmission date and time.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Acquirer ID (A).

D.13.4 SMS614 Description

This report lists the adjustment and merchandise credit transactions processed by Visa for the issuer during the processing day, with the accompanying reason code. It lists adjustments for transactions that did not process correctly when originally submitted. It also lists merchandise returns. The following types of adjustments are reported:

- Debit and credit adjustments initiated for ATM dispensation errors
- Back office (acquirer) adjustments for ATM and POS processing errors
- POS merchandise returns (Interlink merchandise credits)
- Transactions displayed on this report also appear on the Issuer Transaction Detail Report (SMS600)

D.13.5 SMS614 Sample(s)

The following pages provide samples of the 614 report.

D.13.9 SMS614 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Issuer Adjustment and Merchandise Credit Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.14 SMS615—ACQUIRER ADJUSTMENT AND MERCHANDISE CREDIT DETAIL

D.14.1 SMS615 Purpose

Provides a list of adjustment and merchandise credit messages processed by Visa for the member when the member is acting as an acquirer. The acquirer uses this report to verify adjustments submitted because the original transaction did not process correctly.

D.14.2 SMS615 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.14.3 SMS615 Sort Sequence

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).
I	Issuer ID, cardholder number, and trace number.

Sort Criteria

Cardholder Number (C), Retrieval Reference Number (R), and Issuer ID (I).

D.14.4 SMS615 Description

This report lists the adjustment and merchandise credit transactions submitted by the acquirer during the processing day. It lists adjustments for transactions that did not process correctly when originally submitted. It also lists merchandise returns from SingleConnect POS acquirers. The following types of adjustments are reported:

- Debit and credit adjustments initiated by the system for ATM dispensation errors.
- Back room (acquirer) adjustments for ATM and POS processing errors.
- POS merchandise returns (Interlink merchandise credits).
- Transactions displayed on this report also appear on the Acquirer Transaction Detail Report (SMS601).

D.14.5 SMS615 Sample(s)

The following pages provide samples of the 615 report.

D.14.9 SMS615 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Acquirer Adjustment and Merchandise Credit Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.15 SMS616—ISSUER CANCELLATION AND REVERSAL DETAIL

D.15.1 SMS616 Purpose

Provides a list of POS and ATM cancellation and reversal messages processed by Visa for the member when the member is acting as an issuer. The issuer uses this report to verify cancellations and reversals submitted by the acquirer because of processing errors.

D.15.2 SMS616 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.15.3 SMS616 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).

Sort Criteria

Cardholder Number (C) and Retrieval Reference Number (R).

D.15.4 SMS616 Description

This report lists the POS and ATM cancellation and reversal transactions received by the issuer during the processing day, with the accompanying reason code. Transactions displayed on this report also appear on the Issuer Transaction Detail Report (SMS600). The following types of cancellations and reversals are reported:

- Cancellations at the point of sale (Interlink only)
- Point of service reversals for ATM and POS processing errors
- Acquirer center-initiated reversals
- Switch reversal processing
- Chargeback reversals are not included on this report. They are included on the SMS600 and SMS610 issuer reports.

D.15.8 SMS616 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Issuer Cancellation and Reversal Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.16 SMS617—ACQUIRER CANCELLATION AND REVERSAL DETAIL

D.16.1 SMS617 Purpose

Provides a list of POS and ATM cancellation and reversal messages processed by Visa for the member when the member is acting as an acquirer. The acquirer uses this report to verify cancellations and reversals submitted because of processing errors.

D.16.2 SMS617 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.16.3 SMS617 Sort Sequence

C	Cardholder number, issuer ID, and trace number.
R	Retrieval reference number, cardholder number, and transmission date and time, expressed in Greenwich mean time (GMT).

Sort Criteria

Cardholder Number (C) and Retrieval Reference Number (R).

D.16.4 SMS617 Description

This report lists the POS and ATM cancellation and reversal transactions initiated by the acquirer during the processing day, with the accompanying reason code. Transactions displayed on this report also appear on the Acquirer Transaction Detail Report (SMS601). The following types of cancellations and reversals are reported:

- Cancellations at the point of sale (Interlink only)
- Point of service reversals for ATM and POS processing errors
- Acquirer center-initiated reversals
- Switch reversal processing

Chargeback reversals are not included on this report. They are included on the SMS601 and SMS611 acquirer reports.

D.16.8 SMS617 Field Descriptions

Information displayed on this report is taken from the request and response messages. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Acquirer Cancellation and Reversal Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.17 OTHER TRANSACTION DETAIL REPORTS

This section contains report samples and field descriptions for the SMS other transaction detail reports.

D.18 SMS608—FEE COLLECTION AND FUNDS DISBURSEMENT DETAIL

D.18.1 SMS608 Purpose

Provides a list of fee collection and funds disbursement messages processed by Visa for the member.

D.18.2 SMS608 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.18.3 SMS608 Sort Sequence

C	Cardholder number, source ID, and trace number.

Sort Criteria

Cardholder Number (C).

D.18.4 SMS608 Description

This report lists the fee collection and/or funds disbursements applied to a member's settlement amounts. The amounts on this report are also included in the "Funds Disburse RC–0100" and "Fee Collection RC–0140" portion of the "Other Transactions" section of the VSS-120 Interchange Value Report. Transactions displayed on this report do not appear on any other SMS report.

D.18.5 SMS608 Sample(s)

The following page provides a sample of the SMS608 report.

D.18.7 SMS608 Field Descriptions

An explanation of the unique fields displayed on the SMS608 report is provided in following table. Explanations of the column and data line fields are shown in Table D-3 and Table D-4.

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals.

The header on the Fee Collection and Funds Disbursement Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

Table D-9 Fee Collection and Funds Disbursement Detail Column Headings

Column Heading	Contents	Field Number and Name
SOURCE ID	For the source of the Fee Collection/Funds Disbursement, the Affiliate BIN for the destination will be populated; for the destination of the Fee Collection/Funds Disbursement, the Affiliate BIN for the source will be populated.	Field F32—Acquirer BIN OR Field 33—Forwarding Institution ID (Issuer BIN)
DESC	Up to two-line (255 characters) description that explains the purpose of the message and expands on the reason code.	Field 48—Usage 5 (Fee Collections /Funds Disbursements)

D.19 MAINTENANCE REPORTS

The SMS maintenance reports assist the member to track the maintenance transactions initiated and received during the processing day, calendar week, and the calendar month.

This section contains report samples and field descriptions for the SMS maintenance reports. The following reports are available:

- **SMS620**—Issuer File Maintenance Daily Summary
- **SMS624**—Routing Table Update Weekly Summary
- **SMS626**—Administrative Message Daily Summary
- **SMS628**—Request for Copy Daily Summary

D.20 SMS620—ISSUER FILE MAINTENANCE DAILY SUMMARY

D.20.1 SMS620 Purpose

Provides the issuer confirmation whether submitted file update transactions were applied to the Address Verification, Exception, and PIN Verification files.

D.20.2 SMS620 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.20.3 SMS620 Sort Sequence

C	Cardholder number, batch number, transmission date and time (GMT), and trace number.
T	Batch number, transmission date and time (GMT), cardholder number, and trace number.

Sort Criteria

Cardholder Number (C), and Transmission Date and Time (T).

D.20.4 SMS620 Description

This report lists all Address Verification, Exception, and PIN Verification file updates sent by the issuer. Both online 0302 updates and batch updates processed by magnetic tape are displayed. Transactions displayed on this report do not appear on any other SMS report.

The report includes any updates not applied to the files due to an error. Errors are identified by a nonzero value in the Response Code column. The four digit-error code in this column is the same as that returned in Field 48—Additional Data–Private in an online 0312 response.

D.20.5 SMS620 Sample(s)

The following pages provide samples of the 620 report.

D.20.8 SMS620 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Issuer File Maintenance Daily Summary Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

The fields on the Issuer File Maintenance Daily Summary Report are described in the following table.

Table D-10 Issuer File Maintenance Daily Summary Report Column Headings (for SMS620T)

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number *In Message Header*
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
BAT / ONL	Indicates whether the update was submitted via SMS Online or batch.	Not applicable
FILE NAME	The 3-digit file name to which the update is to be applied. • AVS = Address Verification File • PIN = PVV • EXP = SMS Exception File • BTH = BASE I Exception File and SMS • Exception File	Field 101—(File Name)
TRAN TYPE	The 4-digit message type.	Not applicable
ACTV TYPE	Indicates whether the file update is a change, an add, a delete, or an inquiry.	Field 127—(File Records – Action and Data)
PURG DATE	The date on which the account is to be purged from the file, in MMYY format (for format 1 updates) or YYMMDD (for format 2 updates).	Field 73—Date, Action Field 127—(File Records – Action and Data)
ACT CD	The 2-digit Action Code that indicates the issuer-designated response code to be used by stand-in processing (STIP) when authorizing on the issuer's behalf.	Field 127—(File Records – Action and Data)
RSP CD	The 2-digit response code that indicates the response given for the transaction. Or, the 4-digit error code that describes why the request was not posted.	Field 39—Response Code Field 48—Usage 1a, 1b (Error Codes)
PIN ALG	The 2-digit code that identifies the algorithm used by the issuer to verify PINs.	Field 127—(File Records – Action and Data)

Table D-10 Issuer File Maintenance Daily Summary Report Column Headings (for SMS620T) (continued)

Column Heading	Contents	Field Number and Name
SPENDING LIMIT AMOUNT	The up to 6-digit U.S. Dollar amount that can be approved by STIP for this cardholder in any one day. No decimal places are present.	Field 127—(File Records – Action and Data)
SPENDING LIMIT CUR	CUR is the alphanumeric currency code of the spending limit. Currently, the U.S. Dollar is the only currency available for inclusion on the Exception File.	Field 127—(File Records – Action and Data)
SPENDING LIMIT CNT	Up to 2-digit count of approved cardholder transactions allowed in one day.	Field 127—(File Records – Action and Data)
CRB RGN CODE	The 9-digit code that contains the Card Recovery Bulletin (CRB) Region Code.	Field 127E.2—Region Coding
FILE TYPE	The first two digit of the Target File name. Expected Target File name values are: • E3 - BASE I and SMS CDB • E4 - SMS CDB	Field 101—File Name (first two digits)

D.21 SMS624—ROUTING TABLE UPDATE WEEKLY SUMMARY

D.21.1 SMS624 Purpose

Provides the Interlink member a list of Interlink Routing Table updates submitted during the previous week as well as a complete Interlink Routing Table.

D.21.2 SMS624 Frequency

Weekly / On Demand.

D.21.3 SMS624 Sort Sequence

C	Card Range

Sort Criteria

Card Range (C).

D.21.4 SMS624 Description

This report lists all Interlink routing table updates for the week. The report is run on Monday and delivered on Tuesday. Information displayed on this report does not appear on any other SMS report. The first section of the report contains the table updates. The second section is a complete listing of all the accounts on the Interlink Routing Table. The second section does not contain an "Add/Delete" column.

D.21.5 SMS624 Sample(s)

D.21.8 SMS624 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Routing Table Update Weekly Summary Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

The fields on the Routing Table Update Weekly Summary Report are described in the following table.

Table D-11 Routing Table Update Weekly Summary Report Column Headings

Column Heading	Contents	Field Number and Name
CARD PREFIX NUMBER	The prefix of the primary account number listed on the Routing Table.	Not applicable
CARD PREFIX LEN	The prefix length of the primary account number listed on the Routing Table.	Not applicable
PAY LEN	The total length of the primary account number listed on the Routing Table.	Not applicable
CNTRY CODE	The numeric country code in which the card is issued.	Not applicable
ADD / DEL	Indicates whether the account is being added or deleted from the Routing Table.	Not applicable
ISSUING INSTITUTION NAME	The name of the bank that issued the account.	Not applicable

D.22 SMS626—ADMINISTRATIVE MESSAGE DAILY SUMMARY

D.22.1 SMS626 Purpose

Provides the member confirmation of administrative messages submitted and received during the processing day.

D.22.2 SMS626 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.22.3 SMS626 Sort Sequence

Not applicable.

Sort Criteria

Retrieval Reference Number (R).

D.22.4 SMS626 Description

This report lists 06xx administrative messages initiated and received by the member center when acting as an issuer or acquirer. Transactions displayed on this report do not appear on any other SMS report.

D.22.5 SMS626 Sample(s)

The following page provides a sample of the SMS626 report.

D.22.7 SMS626 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Administrative Message Daily Summary Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

The fields on the Administrative Message Daily Summary Report are described in the following table.

Table D-12 Administrative Message Daily Summary Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number *In Message Header*
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
FORWARDING INST ID	The BIN of the institution forwarding the administrative message.	Field 33—Forwarding Institution ID
TRAN TYPE	The 4-digit message type.	Not applicable
RECEIVING INST ID	The BIN of the institution that is to receive the administrative message.	Field 100—Receiving Institution ID
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
DESC:	The text message. The presence of STOPRP after the field identifier indicates the text message is a Stop Recurring Payment advice. This field wraps around to a second line if enough data is present.	Field 48—Usage 9 (Text Messages) Usage 9a (Stop Recurring Payment)

D.23 SMS628—REQUEST FOR COPY ORIGINAL DAILY SUMMARY

D.23.1 SMS628 Purpose

Provides the member confirmation of request for copy and request for original messages submitted and received during the processing day.

D.23.2 SMS628 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.23.3 SMS628 Sort Sequence

C	Cardholder number, acquirer ID, and trace number.
R	Retrieval reference number and transmission date and time (GMT).

Sort Criteria

Cardholder number (C) and Retrieval Reference Number (R).

D.23.4 SMS628 Description

This report lists all 06xx request for copy, request for original, and copy confirmation messages initiated and received by the member center when acting as an issuer or an acquirer. Transactions displayed on this report do not appear on any other SMS report. For VisaNet Copy Request and Fulfillment Service (VCRFS) participants who do not have a Visa Exceptions workstation, the SMS628 report will also display VCRFS advices that are delivered online.

D.23.5 SMS628 Sample(s)

The following page provides a sample of the SMS628 report.

D.23.7 SMS628 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Request For Copy/Original Daily Summary Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

The fields on the Request for Copy/Original Daily Summary Report are described in the following tables.

Table D-13 Request for Copy/Original Daily Summary Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number, 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number *In Message Header*
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
SOURCE ID	ID of the institution that originate the message.	Field 32—Acquiring Institution ID Code
ACPTR NAME	The Card Acceptor Name/Location. This field displays the first 25 characters and the last 2 characters of the Card Acceptor Name/Location with the 2 components separated by a slash symbol (/).	Field 43—Card Acceptor Name/Location
TRAN TYPE	The 4-digit message type.	Not applicable
PROCSS CODE	The 6-digit processing code.	Field 3—Processing Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending the request for copy/original. This field is not present on copy confirmations.	Field 63.3—Message Reason Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
TRANSACTION AMT CUR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the transaction amount.	Field 4—Amount, Transaction Field 9—Currency Code, Transaction

Table D-13 Request for Copy/Original Daily Summary Report Column Headings (continued)

Column Heading	Contents	Field Number and Name
SETTLEMENT AMOUNT (XXX)	The amount of the transaction that affects the settlement account.. Because Copy Requests do not impact settlement totals, this field is present only to differentiate transactions sent to the Chargeback Reduction Service (CRS). If settlement amount has two asterisks (**) after the zero (0) amount, it means the transaction was sent to CRS.	Not applicable

The data line fields for the SMS Request for Copy/Original Daily Summary Report is described in the following table.

Table D-14 Request for Copy/Original Daily Summary Report Data Line Fields

Data Line Fields	Contents	Field Number and Name
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number
ACI:	The one-letter Authorization Characteristics Indicator (ACI).	Field 62.1—Authorization Characteristics Indicator
DESC:	Up to 255-characters of information about the message. This field wraps around to a second line if enough data is present.	Field 48—Usage 8a (Visa Copy Request) Field 125—Supporting Information

D.24 RECONCILIATION REPORTS

SMS reconciliation reports assist the processor in reconciling its position with the V.I.P. System during the processing day. Reports are produced daily and are sent to the processor. Reconciliation reports are optional. This section contains report samples and field descriptions for the SMS reconciliation reports.

D.25 SMS630—GROSS INTERCHANGE VALUE SUMMARY REPORT

D.25.1 SMS630 Purpose

This report provides the processor with a batch-by-batch summary of its interchange activity for one processing day.

D.25.2 SMS630 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.25.3 SMS630 Sort Sequence

Issuer, acquirer, or both, then VisaNet Batch Number 001 through 050.

D.25.4 SMS630 Description

This report provides the processor with a batch-by-batch summary of its interchange activity for one processing day. Interchange totals on this report are taken from 0520 and 0530 reconciliation messages which contain amounts in either Transaction Currency (for members not participating in the Multicurrency Service) or Settlement Currency (for Multicurrency Service participants). Amounts do not include fees and charges. Additionally, because BASE II transactions and suspended Chargeback Reduction Service (CRS) transactions are not included in 0520 advices, they are not included in the SMS630 totals.

The Gross Interchange Value Report provides activity only at the processor level. If a processor has both issuer and acquirer activity associated with one processor ID, the SMS630 creates separate pages for the issuer and acquirer batches.

A Single Message System batch is a 30-minute increment of the processing day. For example, the processing day for SMS Visa and Plus transactions begins at 10:00 p.m. Pacific time, thus batch 001 runs from 10:00 p.m. to 10:29 p.m. Pacific time. Batch 048 spans the period from 9:30 p.m. to 9:59 p.m. Pacific time. Batches 049 and 050 are used for time changes from Pacific standard to Pacific daylight time. Batch 049 is also used in exceptional circumstances when a transaction cannot be assigned to a standard batch category.

For each batch, the report displays up to four batch categories:

- VisaNet—The batch totals accumulated by VisaNet.
- Online—The batch totals the member received online from VisaNet as 0520 advices.
- STIP—The batch totals where Visa performed stand-In processing (STIP) for the member.
- Member—The batch totals returned by the member in its 0530 response when its totals are out of balance with VisaNet totals.

If a batch (001–050) had activity during the processing day, the SMS630 displays the debits, credits, debit reversals, credit reversals, and total for each applicable batch category. If a batch did not have activity, nothing is displayed for the batch. The end of the report contains issuer and acquirer totals.

On the following SMS630 examples, the first example page displays the positional locations of the report's fields.

NOTE

The "Out of Balance" message in the batch header only appears when an out of balance condition exists between the VisaNet totals and the totals provided in the online 0520 message.

The second example page displays several batches with various data combinations, where the processor is acting as an acquirer and the currency is Australian dollars (with two decimal places).

The third example page displays batch data with totals for issuer and acquirer activity, where the currency is Japanese Yen (with no decimal places).

D.25.5 SMS630 Sample(s)

The following pages provide samples of the 630 report. The field values presented in the following samples are as follows:

n = Numeric

a = Amount

c = Count

yy = Year

D.25.9 SMS630 Field Descriptions

For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Gross Interchange Value Summary Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.26 ERROR REPORTS

SMS error reports assist the member center to reconcile its position with the VisaNet Integrated Payment (V.I.P.) System by providing a detailed listing for the issuer or acquirer of transactions rejected by VisaNet or returned by the Chargeback Reduction Service.

Reports are produced daily for delivery to the subscriber. Subscription is optional for all error reports. This section contains report samples and field descriptions for the SMS error reports. The column headings for the SMS error reports are described in the following table.

Table D-15 Error Report Column Headings

Column Heading	Contents	Field Number and Name
BAT NUM	The batch number 001 through 048, 049, 050, 100, and 255.	Field 10—Batch Number In Message Header
TRANSMISSION DATE / TIME	The GMT transmission date (DDMMM) and time (HH:MM:SS).	Field 7—Transmission Date and Time
CARD NUMBER	The primary account number.	Field 2—Primary Account Number
RETRIEVAL REF NUMBER	The 12-digit retrieval reference number.	Field 37—Retrieval Reference Number
TRACE NUMBER	The 6-digit trace number assigned to the transaction by the message initiator to uniquely identify a transaction.	Field 11—Systems Trace Audit Number
ACQRER/ISSUER ID	The ID of the institution that is acting as acquirer or issuer.	Field 32—Acquiring Institution ID Code
TRAN TYPE	The 4-digit message type.	Not applicable
PROCSS CODE	The 6-digit processing code.	Field 3—Processing Code
REAS CODE	The 4-digit message reason code that indicates the reason for sending the request for copy/original. This field is not present on copy confirmations.	Field 63.3—Message Reason Code
POS CON	The 2-digit point of service condition code. This code indicates the condition under which the transaction takes place at the point of service.	Field 25—Point-of-Service Condition Code
RSP CD	The 2-digit response code that indicates the response given for the transaction.	Field 39—Response Code
TRANSACTION AMT CURR	AMT is the amount of the transaction. CUR is the alphanumeric currency code of the transaction amount.	Field 4—Amount, Transaction Field 9—Currency Code, Transaction
REJECT CODE	The 4-digit reject code and a brief explanation of the error.	Field 14—(In Reject Message Header)
RETURN REASON CODE	Up to five 3-digit Chargeback Reduction Service (CRS) return reason codes that indicate the CRS validation criteria that were violated.	Field 48, Usage 7b, positions 60–74 (Return Reason Codes)

The data line fields for the SMS returned exception detail reports are described in the following table.

Table D-16 Returned Exception Detail Report Data Line Fields

Data Line Field	Contents	Field Number and Name
TR ID:	The 15-digit Transaction Identifier and, if present, the 2-digit Multiple Clearing Sequence Number separated from the Tran ID by a slash symbol (/).	Field 62.2—Transaction Identifier Field 62.11—Multiple Clearing Sequence Number
ABA #:	The 9-digit MICR (Magnetic Ink Character Recognition) information scanned from the check by the POS terminal. Contents will be parsed Visa format.	Field 125—Supporting Information

D.27 SMS640—ISSUER ERROR DETAIL

D.27.1 SMS640 Purpose

This report lists all messages initiated by the issuer that were rejected by the Single Message System (SMS) because they did not pass system edits.

D.27.2 SMS640 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.27.3 SMS640 Sort Sequence

T	Batch number, transmission date and time (GMT), cardholder number, and trace number.

Sort Criteria

Transmission Date and Time (T).

D.27.4 SMS640 Description

This report lists all messages initiated by the issuer that were rejected by the Single Message System (SMS) because they did not pass system edits. The Reject Code column contains the reject code and a brief description of the reject reason. Transactions displayed on this report *do not* appear on any other SMS report.

D.27.5 SMS640 Sample(s)

The following page provides a sample of the SMS640 report.

D.27.7 SMS640 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Issuer Error Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.28 SMS641—ACQUIRER ERROR DETAIL

D.28.1 SMS641 Purpose

Provides a list of the acquirer's transactions that were rejected by VisaNet due to content errors. The acquirer uses this report to track rejected messages and determine the reason for VisaNet's rejection.

D.28.2 SMS641 Frequency

Daily / On Demand. When there is no applicable activity, this report is not produced.

D.28.3 SMS641 Sort Sequence

T	Batch number, transmission date and time (GMT), cardholder number, and trace number.

Sort Criteria

Transmission Date and Time (T).

D.28.4 SMS641 Description

This report lists all messages initiated by the acquirer that were rejected by the Single Message System because they did not pass system edits. The Reject Code column contains the reject code and a brief description of the reject reason. Transactions displayed on this report *do not* appear on any other SMS report.

D.28.5 SMS641 Sample(s)

The following page provides a sample of the SMS641 report.

D.30.7 SMS643 Field Descriptions

Information displayed on this report is taken from the request and response messages. For field and code values and descriptions, refer to the *V.I.P. System BASE I Technical Specifications* manuals. The header on the Acquirer Returned Exception Detail Report is the same as for all other SMS reports. For a description of the header fields, see Table D-2.

D.31 RAW DATA–RELEASE 2.2 V.I.P. INTEGRATED FORMAT FOR SMS-CONNECTED MEMBERS

Visa provides the option of receiving transaction details as raw (unformatted) data. Raw data is distinguished from report data in that it is suited for automated processing. Raw data is available to all SMS issuers and acquirers. Users of this service can create and reconcile their own customized reports. The raw data records are produced from the same sources as SMS transaction detail reports.

Raw data records are sent to issuers and acquirers when requested by the user and always include a header and trailer record for control. Release V22 is only available to members that have migrated to VSS. The following types of records are available:

- Header (V22000)
- Settlement information (V22120)
- Financial transaction (V22200–V22290)
- File maintenance (V22300–V22310)
- Administrative message (V22400–V22440)
- Reconciliation message (V22500–V22510)
- Advice notification transaction (V22600–V22610)
- Trailer (V22900)

After the header, the detail raw data records specified by the user are sent in record type sequence; therefore, all financial transaction records are sent before file maintenance records. Preceding each set of financial records, Visa will provide settlement information in a V22120 record.

For members receiving raw data files through their VisaNet Access Point (VAP), raw data records are delivered to members in TC 33 records, which includes an imbedded raw data record.

D.32 TRANSMISSION OPTIONS

V.I.P. Raw Data Release 2.2 offers two methods of transmission for raw data:

- A single transmission for Interlink; a single transmission for other SMS activity
- One raw data transmission with both Interlink transactions and other SMS transactions with the files concatenated (Interlink first, other SMS second)

D.33 RECORD FORMATS

The following tables list the Release 2.2 integrated V.I.P. raw data format record types sent to both SMS and Interlink raw data recipients. All records are 140 bytes in length. For a format record summary, see Table D-17.

NOTE

The last three digits on these record numbers do not correspond to V.I.P System message numbers. (For example, V22400 does not correspond to V.I.P. message 0400.)

Table D-17 V.I.P. Release 2.2 Format Record Summary

Record Category	Record Types	Table Reference Number	Description
A header record precedes the detail raw data records produced for the raw data subscriber.			
Header Record	V22000	Table D-18	Contains the online settlement date and VSS processing date and identifies the raw data subscriber.
After the header, the detail raw data records specified by the raw data subscriber are sent in sets by affiliate BIN, processor, and funds transfer SRE. There is one settlement information record for each set of affiliate BIN/processor/funds transfer SRE records.			
Settlement Information	V22120	Table D-19	Contains the interchange total of all settled transactions at the Affiliate BIN level and identifies the Funds Transfer SRE, Processor ID, Affiliate BIN, and lowest-level SRE associated with the amounts.
Financial Transaction Records V22200–V22282 are generated from a single financial, authorization, or preauthorization transaction. Transactions are sorted by transmission date and time. Records V22200, V22210, and V22220 apply to all card programs and types of transactions.			
Financial Transaction	V22200	Table D-20	Record 1: contains standard financial transaction information.
Financial Transaction	V22210	Table D-21	Record 2: contains standard financial transaction information.
Financial Transaction	V22220	Table D-22	Record 3: contains standard financial transaction information.
Financial Transaction	V22225	Table D-23	Record 4: contains data for chargebacks, adjustments, reversals, preauthorized purchases, representments, cancellations, copy requests and confirmations. Record appears only when these message types occur.
Financial Transaction	V22226	Table D-24	Record 5: contains standard financial transaction information.
Financial Transaction	V22227	Table D-25	Record 6: contains standard financial transaction information.
Financial Transaction	V22230	Table D-26	Contains Visa-only financial payment service transaction data.
Financial Transaction	V22237	Table D-27	Contains standard financial transaction information.
Financial Transaction	V22238	Table D-28	Contains standard financial transaction information.

Table D-17 V.I.P. Release 2.2 Format Record Summary (continued)

Record Category	Record Types	Table Reference Number	Description
Financial Transaction	V22240	Table D-29	Contains Interlink-specific transaction data as well as additional data when transactions require supporting information.
Financial Transaction	V22250	Table D-30	Contains ATM-specific data applicable for Visa ATM and Plus ATM transactions only.
Financial Transaction	V22260	Table D-31	Contains Multicurrency data (for Multicurrency Service participants only).
Financial Transaction	V22270	Table D-32	Contains VisaNet POS Acquirer Services data.
Financial Transaction	V22280	Table D-33	Contains Visa Smart Debit/Visa Smart Credit (VSDC) data.
Financial Transaction	V22281	Table D-34	Contains VSDC data; continuation of V22280 record.
Financial Transaction	V22282	Table D-35	Contains VSDC issuer-only data; continuation of V22280 and V22281 records.
Financial Transaction	V22285	Table D-36	Contains Visa Cash Field 55 data, Record 1.
Financial Transaction	V22286	Table D-37	Contains Visa Cash Field 55 data, Record 2.
Financial Transaction	V22287	Table D-38	Contains Visa Cash Field 55 data, Record 3.
Financial Transaction	V22290	Table D-39	Contains POS Check Service Data.
Records V22300 and V22310 are generated from file maintenance transactions and are issuer-only records. The V22300 record is used for exception and PIN verification data. The V22310 is used for address verification data.			
File Maintenance	V22300	Table D-40	Contains exception or PIN verification data. A 1-character field indicates whether it is an online (O) or batch (B) transaction.
File Maintenance	V22310	Table D-41	Contains address verification file update data. A 1-character field indicates whether it is an online (O) or batch (B) transaction. Applicable for U.S. non-Interlink issuers only.
Records V22400–V22430 are generated from an administrative message.			
Administrative Message	V22400	Table D-42	Record 1: contains information from the standard administrative message.
Administrative Message	V22401	Table D-43	Record 2: contains information from the standard administrative message; continuation of V22400 record.

Table D-17 V.I.P. Release 2.2 Format Record Summary (continued)

Record Category	Record Types	Table Reference Number	Description
Administrative Message	V22405	Table D-44	Record 3: contains information from the standard administrative message; continuation of V22400 and V22401.
Administrative Message	V22410	Table D-45	Contains Visa-specific data.
Administrative Message	V22420	Table D-46	Contains Interlink-specific data.
Administrative Message	V22430	Table D-47	Contains VSDC-specific data.
Administrative Message	V22440	Table D-48	Contains POS Check Service Data.
Record V22500 and V22510 are generated from a reconciliation message and are applicable to the processor only.			
Reconciliation Message	V22500	Table D-49	Contains processor credit information.
Reconciliation Message	V22510	Table D-50	Contains processor debit information; continuation of V22500 record.
Records V22600 and V22610 are generated from advices and are Interlink-specific.			
Advice Notification	V22600	Table D-51	Generated for Interlink advices only.
Advice Notification	V22610	Table D-52	Generated for Interlink advices only; continuation of V22600 record.
A trailer record completes the data set for the raw data recipient.			
Trailer Record	V22900	Table D-53	Contains the detail record count for the file; one per V22000.

D.34 FILE HEADER

This section describes the file header record.

D.34.1 Header Record (V22000)

A header record (V22000) precedes each set of raw data records. The header contains the settlement date and identifies the raw data recipient, as shown in the following table.

Table D-18 Header Record—V22000

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22000: Raw Data Header
Online Settlement Date	7–12	6 N	Not applicable	YYMMDD

Table D-18 Header Record—V22000 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Raw Data Recipient	13–22	10 N	Not applicable	First six digits are Visa-assigned BIN. Last four digits are the network ID.
Filler	23–32	10 AN	Not applicable	Space
Settlement System	33–41	9 AN	Not applicable	VSS (left-justified with trailing space)
VSS Processing Date	42–47	6 N	Not applicable	YYMMDD
Filler	48–130	83 AN	Not applicable	Space

D.35 SETTLEMENT INFORMATION

This section describes a VSS-specific record that contains settlement information.

D.35.1 VSS-Specific (V22120)

The V22120 record contains VSS-specific information including, funds transfer SRE, processor lowest-level SRE, and total interchange amounts. For details, see the following table.

Table D-19 VSS-Specific—V22120

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22120: Settlement Information
Funds Transfer SRE	7–16	10 N	Not applicable	Not applicable
Processor ID	17–26	10 N	Not applicable	Not applicable
Affiliate BIN	27–36	10 N	Not applicable	Not applicable
SRE	37–46	10 N	Not applicable	Not applicable
Settlement Service Indicator	47–49	3 N	Not applicable	For a list of valid codes, see Appendix C, VSS Codes.
Issuer Interchange Amount	50–65	16 N[1]	Calculated by Visa	Not applicable
Acquirer Interchange Amount	66–81	16 N[1]	Calculated by Visa	Not applicable
Other Interchange Amount	82–97	16 N[1]	Calculated by Visa	Not applicable
Gross Interchange Amount	98–113	16 N[1]	Calculated by Visa	Not applicable
Filler	114–130	17 AN	Not applicable	Space

1. Amount fields are signed and are expressed in settlement currency. Decimal places are assumed based on the currency.

D.36 FINANCIAL TRANSACTION RECORDS (V22200–V22290)

Financial transaction records (V22200–V22290) are generated from a single financial transaction.

- V22200, V22210 and V22220 contain standard financial transaction information.
- V22225, V22226, V22227, V22230, V22237, V22238, V22240, V22250, V22260, V22270, V22280, V22281, V22282, V22285, V22256, V22287, and V22290 contain information for specific transactions or processing.

D.36.1 Financial Transaction Record 1 (V22200)

The V22200 record contains key transaction detail information including key fields used to identify a transaction type, as shown in the following table.

Table D-20 Financial Transaction Record 1—V22200

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22200: Financial Record 1
Issuer-Acquirer Indicator	7	1 AN	Not applicable	I = Issuer A = Acquirer
MVV Code	8–17	10 AN	Field 62.20	
Remote Terminal Indicator	18	1 AN	Field 126.12	
Charge Indicator	19	1 AN		
Account Product ID	20–21	2 AN		Left-justified, space-filled to the right
Filler	22–27	6 AN		
Affiliate BIN	28–37	10 N	Not applicable	If "I", the BIN is for the acquirer If "A", the BIN is for the issuer
Settlement Date	38–43	6 N	Not applicable	MMDDYY
Transaction Identifier	44–58	15 N	Field 62.2	Not applicable
Validation Code	59–62	4 AN	Field 62.3	Not applicable
Retrieval Reference Number	63–74	12 AN	Field 37	Not applicable
Trace Number	75–80	6 N	Field 11	Not applicable
Batch Number	81–84	4 N	Header Field 10	Not applicable
Request Message Type	85–88	4 AN	Not applicable	Not applicable
Response Code	89–90	2 AN	Field 39	Not applicable

Table D-20 Financial Transaction Record 1—V22200 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Processing Code	91–96	6 N	Field 3	Not applicable
Card Number	97–115	19 AN	Field 2	Not applicable
Transaction Amount	116–127	12 N[1]	Field 4	Not applicable
Currency Code, Transaction Amount	128–130	3 N	Field 49	Not applicable

1. Amount fields are signed with two implied decimal positions.

D.36.2 Financial Transaction Record 2 (V22210)

The V22210 record contains additional detail financial transaction information, as shown in the following table.

Table D-21 Financial Transaction Record 2—V22210

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22210: Financial Record 2
Local Transaction Date	7–10	4 N	Field 13	MMDD
Local Transaction Time	11–16	6 N	Field 12	HHMMSS
GIV Flag	17	1 AN	Header Field 9	Not applicable
GIV Flag Previous	18	1 AN	Header Field 9	Not applicable
Acquiring Institution ID	19–29	11 N	Field 32	Not applicable
Acquirer Business ID	30–37	8 AN	Field 63.8	Visa card only
Source Station ID	38–43	6 AN	Header Field 6	Not applicable
Destination Station ID	44–49	6 AN	Header Field 5	Not applicable
Message Reason Code	50–53	4 N	Field 63.3	Not applicable
STIP Reason Code	54–57	4 N	Field 63.4	Not applicable
Authorization ID Resp. Code	58–63	6 AN	Field 38	Not applicable
Network ID	64–67	4 N	Field 63.1	Not applicable
Advice Source Flag	68	1 AN	Header Field 9	Not applicable
Advice Transaction Flag	69	1 AN	Header Field 9	Not applicable

Table D-21 Financial Transaction Record 2—V22210 (continued)

Field Name	Position	Attribute	Field Sources	Comments
BASE I Bill Flag	70	1 AN	Header Field 9	Zero for Interlink
Track Data Indicator	71	1 AN	Field 45, P2 or Field 35, P2	1 = Track 1 2 = Track 2
Reimbursement Attribute	72	1 AN	Field 63.11	Not applicable
Reimbursement Fee Debit/Credit Indicator	73	1 AN	Not applicable	Not applicable
Reimbursement Fee	74–80	7 N[1]	Calculated by Visa or by the member	Not applicable
PVS Performed Indicator	81	1 AN	Field 5	0 = No 1 = Yes
Transmission Date	82–85	4 N	Field 7, P1–4	MMDD
Transmission Time	86–91	6 N	Field 7, P5–10	HHMMSS
Transaction Other Amount	92–103	12 N[1]	Field 61.1 or Field 61.2	Field 61.1—Transaction Field 61.2—Cardholder Billing
Downgrade Reason Code	104–105	2 AN	Field 62.3	Not applicable
Authorization Characteristics Indicator	106	1 AN	Field 62.1	Not applicable

Acquiring Institution Country Code	96–98	3 N	Field 19	Not applicable
PAN Extended Country Code	99–101	3 N	Field 20	Not applicable
Forwarding Institution ID	102–112	11 N	Field 33	Not applicable
Forwarding Institution Country Code	113–115	3 N	Field 21	Not applicable
Customer Identification Method	116	1 AN	Field 52—PIN	Not applicable
Issuer Affiliate BIN	117–126	10 AN	Not applicable	Space if acquirer record
Filler	127–130	4 AN	Not applicable	Space

D.36.4 Financial Transaction Record 4 (V22225)

V22225[1] contains information for preauthorization completions, POS cancellations, reversals, adjustments, chargebacks, representments, and good-faith collections.

1. For chargebacks, adjustments, reversals, preauthorized completions, representations, cancellations, copy requests, and copy confirmations.

The V22225 comes in addition to the V22200, V22210, and V22220 for the above-mentioned transactions. For field descriptions, see the following table.

Table D-23 Financial Transaction Record 4—V22225

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22225: Financial Record 4 mandatory for Interlink; optional for SMS
Original Data Elements	7–10	4 AN	Field 90, P1–P4	MMDD
• Message Type • Trace Number	11–16	6 N	Field 90, P5–P10	HHMMSS
• Transmission Date • Transmission Time	17–20	4 N	Field 90, P11–P14	
• Acquiring Institution ID • Forwarding Institution ID	21–26	6 N	Field 90, P15–20	
	27–37	11 N	Field 90, P21–31	
	38–48	11 N	Field 90, P32–42	
Usage Code	49	1 AN	Field 48 Usage 7a, P2	Not applicable for Interlink
Documentation Indicator	50	1 AN	Field 48 Usage 7a, P3	Not applicable for Interlink
Chargeback Reference Number	51–56	6 AN	Field 48 Usage 7a, P4–9	Not applicable for Interlink
Message Text	57–106	50 AN	Field 48 Usage 7a, P10-59	Not applicable for Interlink
Filler	107–130	24 AN	Not applicable	Space

D.36.5 Financial Transaction Record-5 (V22226)

The V22226 record contains additional detail financial transaction information, as shown in the following table.

Table D-24 Financial Transaction Record–5—V22226

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN		V22226: Financial Record 5
Cash-back IRF Amount — Settlement Currency	7–13	7 N[1]	Calculated by Visa	

Table D-24 Financial Transaction Record–5—V22226 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Field 54 Original Amount — Clearing Currency	14–25	12 N[2]	Field 54.5	
Auto Substantiation Amount Type	26–27	2 AN	Field 54.4	Auto Substantiation Amount Type: Valid Values: 4S 4T
Filler	28–130	103 AN		

1. Amount fields are two implied decimal places
2. Amount field is signed with two implied decimal places

D.36.6 E-Commerce 3–D Secure Record (V22227)

The V22227 record contains additional detail financial transaction information, as shown in the following table.

Table D-25 E-Commerce 3–D Secure Record—V22227

Field Name	Position	Attribute	Field Source	Comments
Record Type	1–6	6 AN		V22227: Financial Record 6
Transaction Identifier Data	7–46	40 AN	Field 126.8	
Cardholder Authentication Verification Value (CAVV)	47–86	40 AN	Field 126.9	
Filler	87–130	44 AN		

D.36.7 Financial Transaction Record/Visa Payment Service-Specific (V22230)

V22230 contains additional transaction data when transactions require supporting information, as shown in in the following table.

Table D-26 Financial Transaction Record/Visa Payment Service Specific—V22230

					Length Indicator	Length Indicator	Length Indicator

DX = Hexadecimal Display

D.36.17 Financial Transaction Record/Visa Cash Field 55-Specific (V22285)

V22285 contains additional transaction data when Visa Cash transactions, Field 55-specific, require supporting information as shown in the following table.

Table D-36 Financial Transaction Record/Visa Cash Field 55-Specific —V22285

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22285: Financial, Visa Cash Field 55 Record 1
Field 55 Length	7-9	3 N	Not applicable	Not applicable
Visa Cash CEPS Data	10-130	121 N	Field 55 Segment 1	Position 1–121 of Field 55

D.36.18 Financial Transaction Record/Visa Cash Field 55-Specific (V22286)

V22286 contains additional transaction data for Visa Cash, Field 55-specific as shown in the following table.

Table D-37 Financial Transaction Record/Visa Cash Field 55-Specific —V22286

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22286: Financial, Visa Cash Field 55 Record 2. This record is not created if field length of Field 55 is less than 122.
Visa Cash CEPS Data	7-130	124 AN	Field 55 Segment 2	Position 122–245 of Field 55

D.36.19 Financial Transaction Record/Visa Cash Field 55-Specific (V22287)

V22287 contains additional transaction data for Visa Cash, Field 55-specific as shown in the following table.

Table D-38 Financial Transaction Record/Visa Cash Field 55-Specific—V22287

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22287: Financial, Visa Cash Field 55 Record 3. This record is not created if field length of Field 55 is less than 246.
Visa Cash CEPS Data	7-16	10 AN	Field 55 Segment 3	Position 246–255 of Field 55
Filler	14-130	114 AN	Not applicable	Space

D.36.20 Financial Transaction Record/POS Check Service-Specific (V22290)

V22290 contains additional transaction data when POS Check Service-specific transactions require additional information, as shown in the following table.

Table D-39 Financial Transaction Record/POS Check Service-Specific—V22290

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22290: Financial, POS Check Service.
Check Settlement Code	7	1 AN	Field 44, 12	Valid values: 1 = Visa Settled 2 = ACH Settled 0 = Not Settled
ABA Number	8-16	9 N	Field 125	Contents will be in parsed Visa format.
Account Number	17-35	19 AN	Field 125	Contents will be in parsed Visa format.
Check Number	36-50	15 AN	Field 125	Contents will be in parsed Visa format.
Filler	51-130	80 AN	Not applicable	Space

D.37 FILE MAINTENANCE

This section describes the records used for file maintenance.

D.37.1 Financial Maintenance Transaction Record (V22300)

V22300 is generated from a File Maintenance message, as shown in the following table.

Table D-40 Financial Maintenance Transaction Record—V22300

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22300: File Maintenance
Online/Batch Indicator	7	1 AN	Not applicable	O = Online Maintenance B = Batch Maintenance
File Name	8–10	3 AN	Field 101	Not applicable
Filler	11–30	20 AN	Not applicable	Space
Affiliate BIN	31–40	10 N	Not applicable	Not applicable
Card Number	41–59	19 AN	Field 127.EF5	Not applicable
Purge Date	60–63	4 AN	Field 127.3	YYMM

Table D-40 Financial Maintenance Transaction Record—V22300 (continued)

Field Name	Position	Attribute	Field Sources	Comments
PIN Algorithm Identifier	64–65	2 N	Field 127.PVF4	Not applicable
Cardholder Spend Limit Amount	66–71	6 N	Field 127.EF5	Not applicable
Cardholder Spend Limit Count	72–73	2 N	Field 127.EF6	Not applicable
File Update Code	74	1 AN	Field 127.1	Not applicable
Error Code	75–78	4 AN	Field 48	Not applicable
Action Code	79–80	2 AN	Field 127.EF4	Not applicable
Transmission Date	81–84	4 N	Field 7, P1–4	MMDD
Transmission Time	85–90	6 N	Field 7, P5–10	HHMMSS
Trace Number	91–96	6 N	Field 11	Not applicable
Request Message Type	97–100	4 AN	Not applicable	Not applicable
Response Code	101–102	2 AN	Field 39	Not applicable
Retrieval Reference Number	103–114	12 AN	Field 37	Not applicable
Source Station ID	115–120	6 AN	Field Header 6	Not applicable

Filler	125–130	6 AN	Not applicable	Space

D.38 ADMINISTRATIVE MESSAGES

This section describes the records used in administrative messages.

D.38.1 Administrative Message 1 Transaction Record (V22400)

V22400 contains information from the standard administrative message, as shown in the following table.

Table D-42 Administrative Message 1 Transaction Record—V22400

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22400: Administrative Message 1
Issuer or Acquirer Indicator	7	1 N	Not applicable	I = Issuer A = Acquirer

Table D-42 Administrative Message 1 Transaction Record—V22400 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Filler	8–27	20 AN	Not applicable	Space
Affiliate BIN	28–37	10 N	Not applicable	If "I", the BIN is for the acquirer If "A", the BIN is for the issuer
Settlement Date	38–43	6 AN	SMS: Field 15 Interlink: Field 19	MMDDYY
Transaction ID Value	44–58	15 N	Field 62.2	Visa card only
Validation Code Value	59–62	4 AN	Field 62.3	Visa card only
Retrieval Reference Number	63–74	12 AN	Field 37, P1–12	Not applicable
Trace Number	75–80	6 N	Field 11	Not applicable
Request Message Type	81–84	4 AN	Not applicable	Not applicable
Message Reason Code	85–88	4 N	Field 63.3	Not applicable
Card Number	89–107	19 AN	Field 2	Not applicable
Transaction Amount	108–119	12 N[1]	Field 4	Not applicable
Filler	120–130	11 AN	Not applicable	Space

1. Amount fields are signed with two implied decimal positions.

D.38.2 Administrative Message 2 Transaction Record (V22401)

V22401 contains information from the standard administrative message, as shown in the following table.

Table D-43 Administrative Message 2 Transaction Record—V22401

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22401: Administrative Message 2
Transmission Date	7–10	4 N	Field 7, P1–4	MMDD
Transmission Time	11–16	6 N	Field 7, P5–10	HHMMSS
STIP Reason Code	17–20	4 N	Field 63.4	Not applicable
Network Management Code	21–23	3 N	Field 70	Not applicable
Network ID	24–27	4 N	Field 63.1	Not applicable
Reimbursement Attribute	28	1 AN	Field 63.11	Not applicable

Table D-43 Administrative Message 2 Transaction Record—V22401 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Settlement Service Requested	29	1 N	Converted from Header Field 9	Valid values: 0, 8, 9
Settlement Service Selected	30	1 N	Converted from Header Field 9	Valid values: 0, 8, 9
IRF Option	31	1 N	Not applicable	Valid values: 0 = IRF calculated by Visa 1 = IRF calculated by member
Reimbursement Fee Debit/Credit Indicator	32	1 AN	Not applicable	Not applicable
Reimbursement Fee	33–39	7 N	Calculated by Visa or by the member	Not applicable
Settlement Currency Code	40–42	3 AN	Not applicable	Not applicable
Filler	43–130	88 AN	Not applicable	Space

D.38.3 Administrative Message 3 Transaction Record (V22405)

V22405 contains information from the standard administrative message, as shown in the following table.

Table D-44 Administrative Message 3 Transaction Record—V22405

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22405: Administrative Message 3
Response Message Types	7–10	4 AN	Not applicable	Not applicable
Acquiring Institution ID	11–21	11 N	Field 32	Not applicable
Message Text	22–121	100 AN	V.I.P: Field 48 Usage 9, P2 Interlink: Field 125 Usage 1, P19	Message text begins in position 2 for field 48 and in position 19 for field 125. Messages are truncated after the first 100 characters.
Filler	122–130	9 AN	Not applicable	Space

D.38.4 Administrative Message Transaction Record/Visa-Specific (V22410)

V22410[2] contains supporting transaction data, as shown in the following table.

Table D-45 Administrative Message Transaction Record/Visa-Specific—V22410

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22410: Administrative Message–Visa-Specific
Card Acceptor Name	7–31	25 AN	Field 43, P1–25	Not applicable
Card Acceptor City	32–44	13 AN	Field 43, P26–38	Not applicable
Card Acceptor Country	45–46	2 AN	Field 43, P39–40	Not applicable
BASE I Flag	47	1 AN	Not applicable	Not applicable
Original Trace Number	48–53	6 N	Field 90, P5–10	Not applicable
CRS Validation Return Codes	54–68	15 AN	Field 48 Usage 8b, P27–41	Not applicable
Multiple Clearing Seq. Numbers	69–70	2 AN	Field 62.11	Not applicable
Authorization Char. Indicator	71	1 AN	Field 62.1	Not applicable
Usage Code	72	1 AN	Field 48 Usage 7a, P2	Not applicable
Documentation Indicator	73	1 AN	Field 48 Usage 7a, P3	Not applicable
Chargeback Reference Number	74–79	6 AN	Field 48 Usage 7a, P4–9	Not applicable
Message Text	80–129	50 AN	Field 48 Usage 7a, P10–59	Not applicable
Filler	130	1 AN	Not applicable	Space

2. This record applies for all programs except Interlink.

D.38.5 Administrative Message Transaction Record/Interlink-Specific (V22420)

V22420 contains supporting transaction data, as shown in the following table.

Table D-46 Administrative Message Transaction Record/Interlink-Specific—V22420

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22420: Administrative Message–Interlink-Specific
Original Message Types	7–10	4 AN	Field 90, P1–4	Not applicable
Original Trace Number	11–16	6 N	Field 90, P5–10	Not applicable
Original Transmission Date	17–20	4 N	Field 90, P11–14	Not applicable
Original Transmission Time	21–26	6 N	Field 90, P15–20	Not applicable
Supporting Information: • Contact Name • Contact Phone • Copy Request: - Date Document Sent - Documentation Delivery - Method - Original Data	27–41 42–51 52–57 58–59 60–69	15 AN 10 N 6 N 2 N 10 N	Field 125.1 Field 125.2 Field 125.3 Field 125.4 Field 125.5	Not applicable
Filler	70–130	61 AN	Not applicable	Space

D.38.6 Administrative Message Transaction Record/VSDC-Specific, Continuation Record (V22430)

V22430 contains supporting transaction data, as shown in the following table.

Table D-47 Administrative Message Transaction Record/VSDC-Specific, Continuation Record—V22430

Old Name Field Name	New Field Name	Position	Attribute	Field Sources	Comments		
Record Type		1–6	6 AN	Not applicable	V22430: Administrative Message, VSDC-specific, Continuation Record		
Card Sequence Number		7–9	3 N	Field 23	Not applicable		
Terminal Capability Profile		10–15	6 DX	Field 130	Hexadecimal display		
Terminal Verification Results		16–25	10 DX	Field 131	Hexadecimal display

					Length Indicator	Length Indicator	Length Indicator

DX = Hexadecimal Display

D.38.7 Administrative Message Transaction Record/POS Check Service-Specific (V22440)

V22440 contains transaction data for POS Check Service transactions, as shown in the following table.

Table D-48 Administrative Message Transaction Record/POS Check Service-Specific— (V22440)

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1-6	6AN	Not applicable	V22440– Administrative Message, POS Check Service.
Check Settlement Code	7	1AN	Field 44.12	Valid Values: 1 = Visa settled 2 = ACH settled 0 = Not settled
ABA Number	8-16	9N	Field 125	Contents will be in parsed Visa format.
Account Number	17-35	19AN	Field 125	Contents will be in parsed Visa format.
Check Number	36-50	15AN	Field 125	Contents will be in parsed Visa format.
Filler	51-130	80AN	Not applicable	Space

D.39 RECONCILIATION MESSAGES

This section describes the records used in reconciliation messages.

D.39.1 Reconciliation Message 1 Transaction Record (V22500)

The reconciliation message transaction record contains the credit (V22500) information for the affiliate BIN. There is a record for each of the batches (0520 messages) generated by the online throughout a processing day. For field descriptions, see the following table.

Table D-49 Reconciliation Message 1 Transaction Record—V22500

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22500: Reconciliation Message 1
Filler	7–26	20 AN	Not applicable	Space
Processor	27–36	10 N	Not applicable	Not applicable
Settlement Date	37–42	6 N	Field 15	Not applicable
Network Management Code	43–45	3 N	Field 70	Not applicable
Batch Number	46–49	4 N	Header Field 10	Not applicable
Trace Number	50–55	6 N	Field 11	Not applicable
Credit Count	56–65	10 N	Field 74	Not applicable
Credit Amount	66–81	16 N[1]	Field 86	Not applicable
Credit Reversal Count	82–91	10 N	Field 75	Not applicable
Credit Reversal Amount	92–107	16 N[1]	Field 87	Not applicable
Filler	108–130	23 AN	Not applicable	Space

1. Amount fields are signed with two implied decimal positions.

D.39.2 Reconciliation Message 2 Transaction Record (V22510)

The reconciliation message transaction record contains the debit (V22510) information for the affiliate BIN. There is a record for each of the batches (0520 messages) generated by the online throughout a processing day. For field descriptions, see the following table.

Table D-50 Reconciliation Message 2 Transaction Record—V22510

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22510: Reconciliation Message 2
Debit Count	7–16	10 N	Field 76	Not applicable
Debit Amount	17–32	16 N[1]	Field 88	Not applicable

Table D-50 Reconciliation Message 2 Transaction Record—V22510 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Debit Reversal Count	33–42	10 N	Field 77	Not applicable
Debit Reversal Amount	43–58	16 N[1]	Field 89	Not applicable
Net Sett. Debit/Credit Indicator	59	1AN	Field 97, P1	Valid values: C = Credit D = Debit
Net Settlement Amount	60–75	16 N[1]	Field 97, P2–17	Not applicable
Settlement Code	76	1 N	Field 66	Not applicable
Filler	77–130	54 AN	Not applicable	Space

1. Amount fields are signed with two implied decimal positions.

D.40 ADVICE NOTIFICATION

This section describes the records for advice notification messages.

D.40.1 Advice Notification Transaction Record/Interlink-Specific (V22600 and V22610)

V22600 is generated for Interlink advices only. V22610 is continuation for V22600 in display format. For field descriptions, see Table D-51 and Table D-52.

Table D-51 Advice Notification Transaction Record/Interlink-Specific—V22600

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22600: Interlink Advice Notification
Issuer/Acquirer Indicator	7	1 AN	Not applicable	I = Issuer A = Acquirer
Filler	8–27	20 AN	Not applicable	Space
Affiliate BIN	28–37	10 N	Not applicable	If “I”, the BIN is for the acquirer If “A”, the BIN is for the issuer
Settlement Date	38–43	6 N	Not applicable	Not applicable
Trace Number	44–49	6 N	Field 11	Not applicable

Table D-51 Advice Notification Transaction Record/Interlink-Specific—V22600 (continued)

Field Name	Position	Attribute	Field Sources	Comments
Batch Number	50–53	4 N	Header Field 10	Not applicable
STIP Reason Code	54–57	4 N	Header Field 9	Not applicable
Request Message Type	58–61	4 AN	Not applicable	Not applicable
Response Message Type	62–65	4 AN	Not applicable	Not applicable
Response Code	66–67	2 AN	Field 39	Not applicable
Retrieval Reference Number	68–79	12 AN	Field 37, P1–12	Not applicable
Transmission Date	80–83	4 N	Field 7, P1–4	Not applicable
Transmission Time	84–89	6 N	Field 7, P5–10	Not applicable
Card Number	90–108	19 AN	Field 2	Not applicable
Transaction Amount	109–120	12 N[1]	Field 4	Not applicable
Filler	121–130	10 AN	Not applicable	Space

1. Amount fields are signed with two implied decimal positions.

A description of the advice notification transaction record for Interlink is provided in in the following table.

Table D-52 Advice Notification Transaction Record/Interlink-Specific—V22610

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22610: Interlink Advice Notification
Acquirer Institution ID	7–17	11 N	Field 32	Not applicable
Filler	18–130	113 AN	Not applicable	Space

D.41 TRAILER RECORD

This section describes the trailer record.

D.41.1 Trailer Record (V22900)

V22900 contains the detail record count for the file, as shown in the following table.

Table D-53 Trailer Record—V22900

Field Name	Position	Attribute	Field Sources	Comments
Record Type	1–6	6 AN	Not applicable	V22900: Trailer
Subscriber BIN	7–16	10 N	Not applicable	Not applicable
Filler	17–26	10 AN	Not applicable	Space
Total Record Count	27–37	11 N	Not applicable	Equals detail record count only
Filler	38–130	93 AN	Not applicable	Space
Raw Data Filler	131–140	10 AN	Not applicable	Destination (subscriber) BIN

Appendix E

VSS Business Transaction Types Cross-Reference

This appendix provides the following cross-references:

- BASE II Transactions to VSS Business Transaction Types
- SMS (Excluding Interlink) Transactions to VSS Business Transaction Types
- SMS (Including Interlink) Transactions to VSS Business Transaction Types

E.1 BASE II TRANSACTIONS TO VSS BUSINESS TRANSACTION TYPES

This section provides a cross-reference between BASE II transactions and VisaNet Settlement Service (VSS) business transaction types, as shown in Table E-1.

Table E-1 BASE II Transaction Cross-Reference to VSS Business Transaction Types

	BASE II Transaction Code			Business Mode	
Transaction Description	**TC**	**Additional Data**	**VSS Business Transaction Type**	**Outgoing**	**Incoming**
Returned Credit[1]	01	Not applicable	Not applicable	Not applicable	Acquirer/Issuer/Other
Returned Debit[1]	02	Not applicable	Not applicable	Not applicable	Acquirer/Issuer/Other
Returned Nonfinancial[1]	03	Not applicable	Not applicable	Not applicable	Acquirer/Issuer/Other
Reclassification Advice	04	Not applicable	Reclassification Advice	Not applicable	Acquirer
Sales Draft First Presentment	05	Usage Code = 1	Purchase Original Sale	Acquirer	Issuer
Sales Draft First Presentment (VisaPhone)	05	Usage Code = 1 (and acquiring BIN)	VisaPhone Original Phone Call	Acquirer	Issuer
Sales Draft First Presentment (Quasi-cash)	05	Usage Code = 1 Special Condition Indicator = 8	Quasi-cash Original Sale	Acquirer	Issuer
Sales Draft Second Presentment	05	Usage Code = 2	Purchase Representment	Acquirer	Issuer
Sales Draft Second Presentment (VisaPhone)	05	Usage Code = 2 (and acquiring BIN)	VisaPhone Representment	Acquirer	Issuer
Sales Draft Second Presentment (Quasi-cash)	05	Usage Code = 2 Special Condition Indicator = 8	Quasi-cash Representment	Acquirer	Issuer
Credit Voucher First Presentment	06	Usage Code = 1	Merchandise Credit Original	Acquirer	Issuer
Credit Voucher First Presentment (Quasi-cash)	06	Usage Code = 1 Special Condition Indicator = 8	Quasi-cash Credit Original	Acquirer	Issuer
Credit Voucher Second Presentment	06	Usage Code = 2 (and acquiring BIN)	Merchandise Credit Representment	Acquirer	Issuer
